Hygiene
& more ...

For over 35 years, Abudawood Trading Company is your KSA “world class” provider of market leading Aviation, Institutional, Industrial, and Wholesale chemicals in the Kingdom of Saudi Arabia.

Abudawood Trading Company is a family-owned business based in Jeddah with a distribution network to cover all major cities of Saudi Arabia

- Resident technical specialists
- Regional offices with over 20,000 sq ft of warehousing
- Over 15 service engineers to provide 24/7 after sales service
- A continuous commitment to the development of the Saudi workforce and local manufacturing

Distributes leading chemical manufacturers who provide cleaning, food safety and health protection products and services for the hospitality, food service, healthcare, wholesale, aviation, and industrial markets.

WORLD RENOWNED COMPANIES REPRESENTED:

ECOLAB

With over \$14 billion in global sales, Ecolab is the world's leading provider of cleaning, food safety and health protection products and services for the hospitality, food service, healthcare, and industrial markets.

CLOROX

With over \$6 billion in global sales, Clorox is a leading manufacturer and marketer of consumer and professional products. Abudawood Trading Co is the exclusive distributor for Clorox 30 Liter packaging.

NCH

Founded in 1919, NCH Corporation is a global leader in industrial, commercial, and institutional maintenance products and services with worldwide revenues over \$1.5 billion.

ESSITY [TORK PAPER]

A leading global hygiene and health company dedicated to improving the well being through products and services. Net sales in 2019 were approximately €12.2 billion.

CEE-BEE AVIATION

Cee-Bee Aviation takes pride in its many years of product service to the commercial and aviation industries.

ABUDAWOOD INDUSTRIAL COMPANY

A sister company of Abudawood Trading Company set up on the royal commission in Yanbu over 30 years ago to provide local manufacture of our best –selling products. Our local production of hand sanitizers and disinfectants has proved invaluable to the market during the Corona crisis. There will be further opportunities to clean and disinfect all buildings as we go forward.

Institutional & more ...

Our comprehensive **ECOLAB** product range helps our institutional customers succeed in promoting guest satisfaction through:

Food and Beverage:

Safe and effective solid ware washing systems

Housekeeping:

Oasis Pro concentrates reduce packaging by over 60%, provide effective cleaning and disinfection at one of the lowest in use costs in the market.

Laundry:

Full range of OPL liquid laundry chemistry, with tried and tested wash programs, maintained through state-of-the-art dispensers.

Floor Care:

Sealers and maintainers for all porous floors, designed to reduce labor and in use costs while maximizing floor life.

VECTAIR provide a full range of indoor air care system including solids and atomizers.

Quick Service Restaurants & more ...

Our market leading **KAY QSR** program difference:

- Quick Service Restaurant dedicated salespeople
- We provide training, product dispensers and guidance at store level to ensure the best hygiene standard are achieved and maintained at the lowest in use cost
- Safe, easy to use, high performing products that deliver the single best solution for all your operations

Textile Care & more ...

ECOLAB Textile Care optimizes water and energy consumptions combined with providing the longest textile lifetime.

The OXYGUARD 40 Technology provides:

- Effective energy savings [up to 20%] due to low temperature processes
- Water optimization [up to 50%] due to improved rinsing capabilities
- Minimized investments in textile assists [up to 20%] due to gentle treatment
- Highest levels of sustainability Ecolabel DE/039/002

SUSTAINABLE SOLUTIONS

WINNER OF TRSA'S CLEAN GREEN SUSTAINABILITY AWARD

The honor recognizes outstanding efforts in environmental improvement of Ecolab's **Blue Ocean** which enables operators to meet energy and water conservation goals, retain and grow their customer base and conserve critical resources.

Customer Impact Goal	Ecolab's 2020 Sustainability Goals
In 2017, we helped our customers save more than 171 billion gallons of water	Reduce water withdrawal by 25%* 25%
By 2030, we aim to conserve 300 billion gallons of water annually <small>by reducing water consumption within our own and our customers' operations</small>	Reduce greenhouse gas emissions by 10%* 10%
This equals annual drinking water needs of more than 1 billion people	

PROUD TO BE RECOGNIZED AWARDS AND RECOGNITION

 Ranked #2 U.S. 500 List	 50 Most Community-Minded Companies	 Ranked #43	 Ranked #27
 Ranked #3 in Chemicals Industry	 Ranked #10	 100% Water Positive	 6th consecutive year
 2017 North America Index	 4th consecutive year	 Ranked #10	 Water A List
 Named Best for Vets Employer	 100% Corporate Equality Index	 2017 Visionary Award	 Ranked #21

Industrial & more ...

NCH provides over 100 years' experience of solving customers' maintenance problems through a wide range of products and services which includes:

- Superior lubricants that provide added protection against heavy loads, heat, friction, and contaminants extending the reliability and life of your equipment
- Full range of water and solvent bases degreasers approved by **ARAMCO** and **SABIC**
- Recommended products to clean and maintain HVAC systems
- Descaling and rust preventative treatments
- Full range of industrial aerosols including penetrating fluids, contact cleaners, anti-seize compounds, chain and cable lubricants
- Drain care products to open and maintain all drain systems including the award-winning biological dispensing system the **Bio Amp**

THE FREE-FLOW™/DrainCobra™ DIFFERENCE

THE SOLUTION: THE INTRODUCTION OF FREE-FLOW™ BACTERIA

THE FREE-FLOW DIFFERENCE

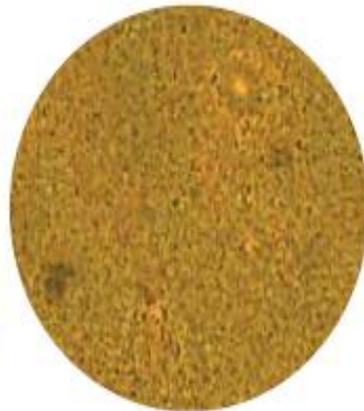

SPORE/ENZYME

FREE-FLOW BACTERIA

- Liquefies FOG
- Ineffective, weak and dormant bacteria
- Outdated technology

**• BANNED BY
MANY CITY AND
COUNTY WATER
AUTHORITIES**

- Digests FOG
- Converts FOG to water and CO₂
- Innovative and patented technology

**• THE SAME
BACTERIA
FREQUENTLY USED
BY WASTEWATER
TREATMENT
FACILITIES**

THE KEY TO IMPLEMENTING A SUCCESSFUL BIOLOGICAL DRAIN PROGRAM IS THROUGH THE USE OF LIVE BACTERIA

FREE-FLOW™ Biological Drain Maintenance Systems for Green Programs

BIOLOGICALS: AN UNEVEN PAST

1980s

1980s — ENZYMES

- The first biological maintenance product used to treat drains
- These products quickly emulsified FOG allowing it to pass through a drain system
- However, this caused the grease to resolidify downstream resulting in larger problems for municipalities
- Many municipalities eventually banned these type products

1990s

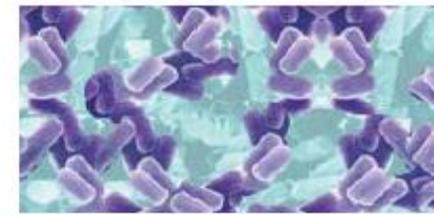

1990s — SPORE BACTERIA

- Because of the problems associated with enzymes, manufacturers produced spore form bacteria that could digest FOG and convert it into water and CO₂
- Due to their protective shell necessary to extend shelf life, these bacteria require 4-6 hours to “wake up” and become active
- Most facilities do not have the necessary retention time to allow the bacteria to become active and effectively degrade waste

2000s

2000s — LIVE VEGETATIVE BACTERIA

- An engineering breakthrough occurred when live, vegetative, non-spore form bacteria was developed
- By creating the proper environment and adequate retention time, this delivery system is able to harness the power of live bacteria to safely and effectively treat your drains
- Certified 95% Biobased by USDA BioPreferred® Program

STRATA™ XTREME CJ-4†

Advanced Performance Synthetic Blend Motor Oil

SAE 15W-40, 10W-30, 5W-30, 5W-20

Synthetic blend, multi-grade Diesel or Gasoline motor oil formulated for severe duty and extended drain intervals

Provides superior protection against deposit formation, oil breakdown, parts wear and loss of compression.

- Synthetic Blend Formula Engineered for Extended Drain Intervals*
- TBN of 14† Provides Extended Acid Neutralization While Maintaining Low Ash
- Excellent Performance with EGR, ACERT™, ASET™ and Turbo Charged Equipment
- Superior Thermal Stability for Higher Temperature Operation
- High Detergent Retention Prevents Deposit Build-up
- Contains SOLUMOL** for Superior Wear Protection
- Highly Resistant to Oxidation for Longer Oil Life
- High V.I. Number Provides Stable Viscosity Over a Wide Temperature Range
- Superior Cold Cranking and Oil Pumpability at Low Temperature
- Compatible with Synthetic, Synthetic Blend, and Mineral Based Motor Oils

Aviation & more ...

CEE-BEE Aviation provides products and services in the commercial and military aviation industries.

Aviation Cleaners:

CEE-BEE Aviation Cleaners are engineered for safety and effectiveness on the interior and exterior aircraft services

Engine Overhaul:

CEE-BEE Engine Overhaul products are designed to safely remove scale and other typical soils from turbine engine components

Lavatory Maintenance:

CEE-BEE Lavatory products control odors, prevent scale build up and keep lavatory components clean

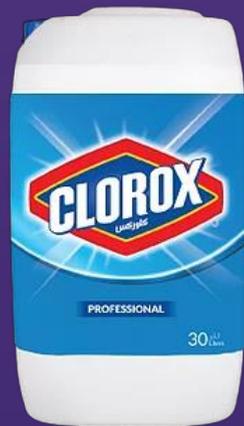

Paint Strippers:

CEE-BEE Paint Strippers are designed to effectively remove commercial or military coating without harming surface metals

Metal Processing Surface Treatment:

CEE-BEE Aviation Chemistries are under the process of aluminum, titanium and other various substrates

Wholesale & more ...

The wholesale sector in the Saudi market is one of the most powerful, accommodating both commercial and household channels. **Abudawood Trading Company** created a team of experienced professionals to market high quality products in commercial sizes to service this growing market.

Abudawood Trading Company distributes **CLOROX** Bleach **30L** in patronship with **Clorox KSA** company.
