

## ABOUT US

Founded in 2002, **Memaar Building Systems (MBS)** is a wholly owned subsidiary of **E II CAPITAL (Emaar Industries and Investments (PVT) JVC)**, and is one of the largest manufacturers of **Pre-Engineered Steel Buildings (PEB)** and sandwich panels in the world. MBS is specialized in the design, manufacture and supply of **Pre-Engineered Steel Buildings (PEB)**, using internationally recognized engineering software and the most advanced production machineries in the **PEB** industry.

Our current monthly production capacity is **8,000MT of steel buildings** and **150,000m² of sandwich panels** (consisting of **PUR** and **PIR** as core insulation) which allows us to handle large fast track jobs in the shortest time period.

Since establishment, **MBS** has supplied more than **50,000 buildings** to more than **100 countries worldwide**.

The **MBS Pre-Engineered Steel Building (PEB) System** is unmatched in its quality, quick delivery and value. Buildings to suit specific needs are designed, engineered, manufactured and shipped in **less than 8 weeks** and at a price that is up to **30% lower** than the price of conventional steel buildings.

Clear span, up to **100m wide** (without intermediate columns), and eave height up to **33m** are achievable. This functional versatility makes **Pre-Engineered Steel Buildings (PEB)** suitable and attractive for industrial, commercial, recreational, institutional, educational, aviation and agricultural applications: such as **factories, workshops, warehouses, sports halls, aircraft hangars, bulk storage, coldstores, poultry buildings and many more**.

For your inquiries, please send an email to [sales@mbs.ae](mailto:sales@mbs.ae) or visit our website at [www.mbs.ae](http://www.mbs.ae), where you may also view/download our marketing literature, manuals and photo gallery which includes pictures of some of our projects.

**Pre-Engineered Steel Buildings (PEB) are the preferred choice for projects due to their:**

- Initial low investment and cost efficiency
- Quick delivery and fast occupancy
- Architectural versatility
- Large span optionality
- Future expansion ability
- Low maintenance requirements
- Quick turnkey construction
- Sustainability, energy efficiency and recyclability
