## CEO'S MESSAGE

Air Master had its humble beginnings in the United Arab Emirates in 1987. With a strength of just 15 people, basic machinery, space and a limited product range, Air Master catered to only small-scale projects. We got our first phenomenal break in 1997 when we successfully supplied 70,000 grilles for Mina Hajj tents (Makkah-KSA) in just 60 days. This transformed our production strategy to cater large-scale projects, the first of which was the Emirates Towers on Sheikh Zayed road, Dubai. There was no turning back since then.

We have borne witness to the changing landscape of the Middle-East from vast sandy deserts to whopping skyscrapers and man-made islands and we are proud to have been part of these projects. Air Master has left its footprints in various prestigious and coveted landmarks of the Middle-East and India. With each project, Airmaster has continuously expanded its product basket while ensuring to implement best practices in manufacturing. By virtue of our quality and service we were entrusted with the world's tallest tower - The Burj Khalifa.

We are committed to implementing business practices that generate value for our clients, employees and shareholders. Our core strength lies in investing in our people, infrastructure and machinery in order to provide uncompromising quality to our customers regardless of project size or value. As a part of our wider business strategy we are mindful of adhering to strict codes of ethical business conduct and fulfilling our social and environmental responsibilities. Airmaster appreciates the vision of exemplary leaders of this great nation by dedicating itself to fulfill the demands that accompany the regional growth.

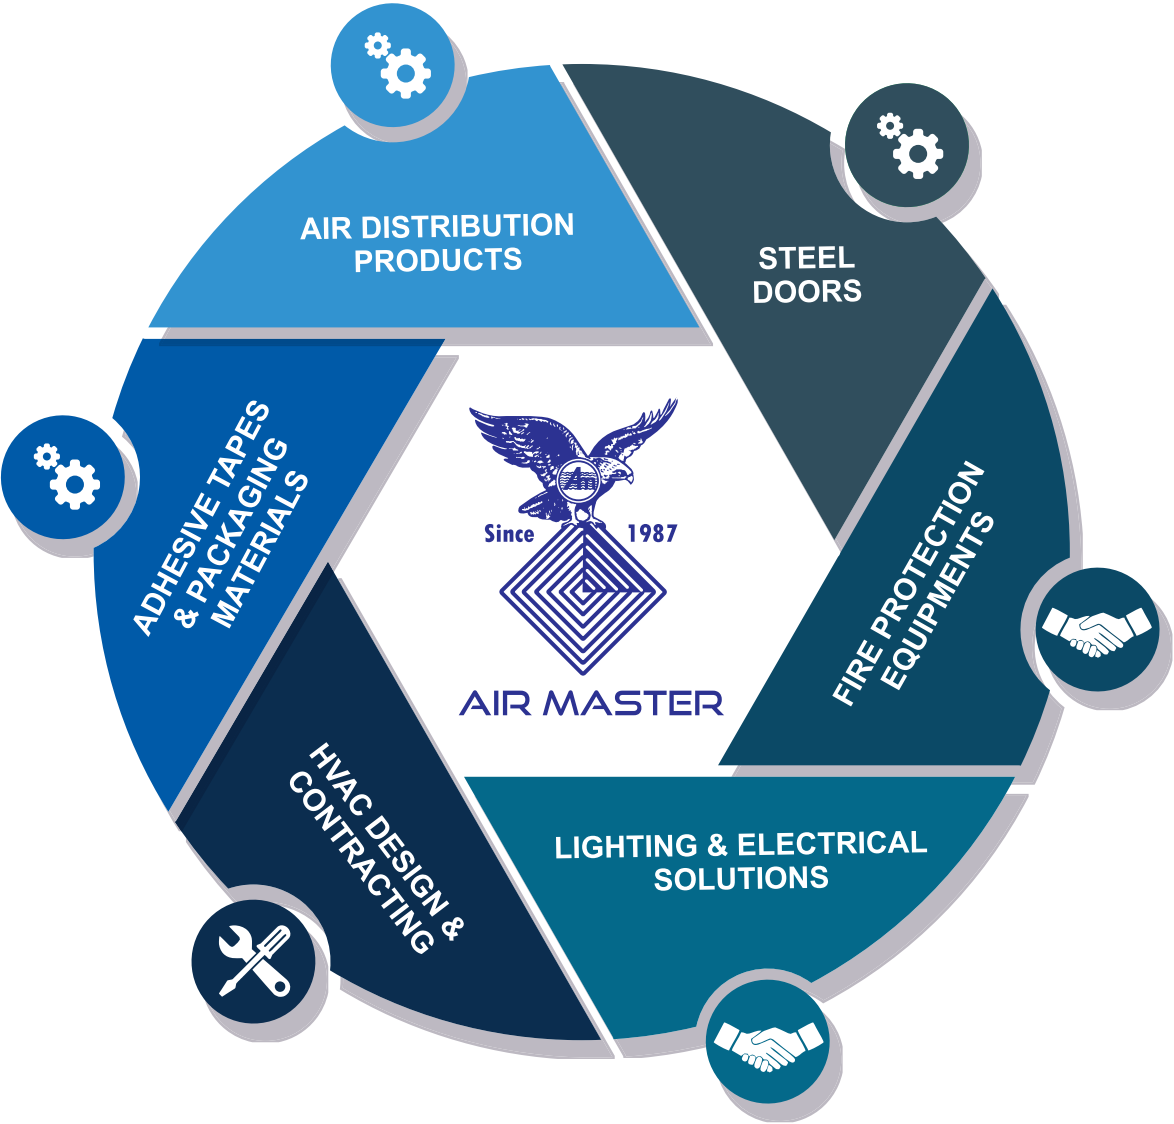

We extend our sincere gratitude to our customers for their unwavering support. Airmaster has always considered it a privilege to collaborate with its customers to develop unique customized products. We look forward to continuing this journey of serving you better.

Through innovation and quality, we prosper!

**Munvar Khan**  
CEO

As has been our legacy, we continue to advance every aspect of our business to meet the changing needs of our customers and HVAC industries worldwide. Ever Since 1987, Airmaster equipment emirates LLC has been serving the HVAC industry with Air-distribution, Ventilation, Fire safety products (UL classified) Rubber insulation, Duct accessories, Adhesive tapes, Lighting fixtures, Electrical accessories and Building management systems. We are committed to helping our customers define their HVAC needs as they apply to our product line and to help them by continuing to innovate and advance the science of air distribution.

ADVANCE METAL INDUSTRIES L.L.C.

## FIRE DOORS

»» Fire and smoke pose a lot of danger to lives and cause extensive property damage. The high quality - UL classified fire doors manufactured by **Advance Metal Industries** compartmentalize a fire event quickly and effectively thus allowing adequate time for the occupants to evacuate a building. They have become the clear and reliable choice for building owners and designers who demand the highest level of safety and fire protection standards. What makes us unique is our efficient customer support and flexible production line regardless of the project size.

- Fire rated single and double doors (steel) – UL classified
- Fire rated windows
- Architectural metal doors
- Acoustic doors
- Steel doors with wooden finish

## FIRE PROTECTION EQUIPMENT

»» **Airmaster Equipment Company** is a progressive and customer focused fire safety equipment provider based in Qatar, offering a wide range of quality products. Our aim is to make this world safe and free from fire hazards by offering best quality fire safety products at reasonable prices. For this reason, we have partnered with several top class manufacturers and distributors across Europe, USA and China and also carry a generous inventory level to cater to the immediate needs of our clients.

- Extinguisher & Gas System
