

DreamGlass® is a product line of smart glass technology solutions

Glass separations are a crucial element of contemporary design. Contemporary glass provides access to natural light and open views, but requires inconvenient blinds, curtains, or roller shades to gain privacy.

DreamGlass® offers a unique, state-of-the-art solution. Enjoy natural lighting and pristine interior spaces without the loss of privacy. At the flick of a switch, the “inbuilt privacy system” included in DreamGlass® products allows for the effortless shift between privacy and transparency.
