Details

Parameters

Model	Size	Voltage	Power	Capacity	Weight	Coverage	Noise
OV-3	171.2*77*204.6mm	DC 12V	4W	300ML	1KG	300-500m ³	≤35dba

Designed Technology

OV-3 model's shell is made of PP plastic which is anti-corrosive and anti-falling. And with the built-in simple button design, users can manually select settings including time period and concentration which allows them to make diversified settings according to environment. Its new technology that combines cold filtered air and high-pressure air fully atomizes essential oils into small particles for efficient diffusion without the additional operation of heating or water, bringing high-quality fragrance to your entire space in just a few minutes.

Application

Home, office, bedroom, brand shops etc small areas.
