BATHROOM FURNITURE

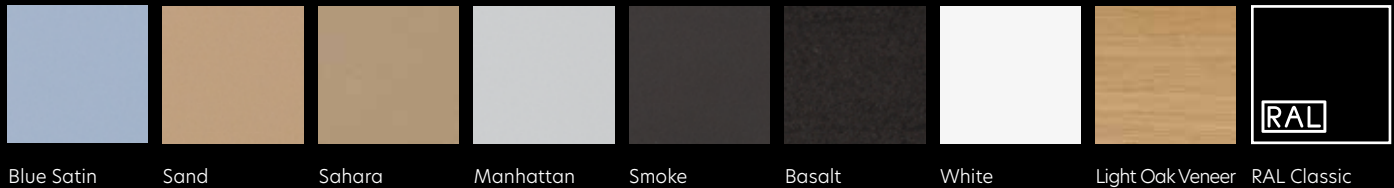

KEUCO

EDITION 11 ART

Colour coordinated. The homogeneity of colours, surfaces and materials creates unique spaces. The combination of carefully coordinated washbasins and bathroom furniture with fittings and accessories creates an overall concept that combines pure elegance with timeless modernity.

EDITION 11 ART

Artful interpretation. The classic series is complemented by the vanity unit with its glass shelf with brackets, a highlight of the collection. This exceptional piece of bathroom furniture is a new interpretation of a vanity unit - an eye-catcher in a coordinated bathroom design.

Harmonious mix of materials. The delicate edges of the ultra-thin 4 mm enamel washbasin blend in with the vanity unit, creating a monolithic look that makes the unit and washbasin blend into one.

The furniture's satin matt lacquered surface enhances the fine architectonic design and complements the soft lines of the washbasin. The floating Glass shelf with brackets provides additional storage in an airy design.

Surprisingly spacious. The mirrored surface conceals a generous storage space: The shelving unit with side compartments allows direct access to care products, beauty items or towels. With its completely tidy front, it contributes to the harmonious overall look of the room.

EDITION 11 ART

Body with character. In addition to high-quality surface materials such as lacquer, veneer and glass, these elegant furniture surfaces are also available in ceramic. The latter two surfaces are also perfectly matched to the colours of the washbasin to achieve a homogeneous design.

A valuable addition. For a truly stunning finish, the furniture's brushed brass fittings, accessories and matching handles have been plated with a fine layer of gold.

EDITION 11 ART

Something to hide. The vanity units and side units are available with one or two drawers. The illuminated interior in elegant carbon black creates an impressive harmony.

The colour-coordinated storage boxes fit seamlessly. The boxes placed transversely structure the lower area of the drawer. Arranged lengthwise, they open up additional storage space on a second level.

Flat and flowing. The minimalist enamel washbasin blends practically seamlessly into the vanity unit. At just 4 mm thin, it is exceptionally flat and emphasises the minimalist look. The soft, flowing shape of the washbasin, without corners or edges, creates a harmonious contrast to the straight edges of the furniture in the range.

Glass as a modern addition. EDITION 11 Art furniture offers a versatile choice of materials for personalised design. The glass is precisely colour-coordinated with the washbasins to create a coherent design. The light-coloured glass gives the Manhattan bathroom furniture an elegant look and emphasises a modern, urban design.

EDITION 11 ART

Organisation at the highest level. The series' tall unit boasts generous storage space on several levels: Two fixed shelves form the middle compartment, while four glass shelves provide additional storage space. Adjustable door dampers ensure smooth closing.

A well-rounded concept. The series' round light mirror is not only a visual highlight. For optimal light intensity, the light colour can be flexibly adjusted via the sensor switch from 2700 to 6500 Kelvin. The mirror heating is activated automatically when the light is switched on, ensuring a clear view even following a shower.

EDITION 11 ART

Small but powerful. The well-thought-out colour concept of the EDITION 11 ART extends down to the smallest detail. The side handle on the furniture is available in the same finishes as various KEUCO Fittings and Accessories.

Harmony from every perspective. For additional storage space, it can be ideally combined with the SOMARIS mirror cabinet from KEUCO. The bathroom design is colour-coordinated right down to the smallest detail, with individually side panels that perfectly match the colours of the EDITION 11 Art bathroom furniture.
