

KEUCO

FITTINGS & ACCESSORIES

Brushed titanium black

The power lies in the quiet. Those who opt for mixer taps and accessories in brushed titanium black set striking accents and experience an unexpectedly calm room architecture. The dark, rich hue exudes a modern industrial character - straightforward and authentic.

Handcrafted for extra strength

KEUCO mixer taps and accessories retain their unmistakable, precise structure through precise brushing of the surfaces. This texture creates an atmosphere of stylish restraint.

At the KEUCO electroplating plant, the products are finally plated in titanium black chrome in an elaborate process with careful handwork. This process guarantees that the surface is ideally suited to the high demands in the bathroom. The subsequent passivation protects the mixer taps and accessories, keeping their distinctive appearance for years to come and making them outstanding against moisture in daily use.

Rough tone in the design language

The fascination for the brushed titanium black surface is expressed impressively in the design of the COLLECTION MOLL accessories. The series embodies absolute timelessness and combines solid materiality with a sensual feel.

IXMO mixer taps can be combined to match the design idiom. Defining the style are the flowing, organic curves – but also the reduced, geometric shapes with clear-cut lines. This design underlines the expressiveness of the brushed titanium black surface.

MOLL
Towel ring, towel hook single and double

→ → MOLL
Toilet paper holder, spare paper holder, toilet brush set

Combining designs in a powerful way

Dark tones emphasise the modern, luxurious look and add depth and drama to the mixer taps and accessories in brushed titanium black. They create urban accents on light surfaces such as concrete. Whatever your preferences, they are guaranteed to turn heads.

Many other products in the diverse KEUCO range are available with the modern, elegant surface.

Discover more surfaces

For a number of decades, KEUCO's success has been based on the high quality of its products. The meticulous processing of the surfaces and their durability in particular are a very decisive quality standard.

Extravagant **PVD surfaces** in warm bronze, champagne-coloured nickel and fine black chrome lend mixer taps and accessories a luxurious touch. The manufacturing process guarantees an extremely resistant surface with a very high degree of hardness.

Velvet matt aluminium surfaces are characterised by their particular resistance to fingerprints and water droplets, for example, and are therefore very easy to clean.

Matt **black** surfaces impress with their special colour intensity. A special powder coating makes them resistant, durable and easy to maintain.

Classic KEUCO **chrome surfaces are created** in a special three-stage process. An additional semi-gloss nickel stage ensures a special deep gloss and long-lasting corrosion protection.
