

## The St. Regis Belgrade

### **Belgrade, Serbia**

In the prestigious St. Regis Belgrade, bespoke crystal installations pay homage to the rich heritage of Balkan jewelry and decorative artistry. Crafted from Bohemian Crystal using time-honored techniques, these monumental sculptures bring elegance and cultural resonance to this prestigious hotel.

The centerpiece of the lobby is a magnificent, elongated crystal installation that weaves its way through the grand space, flowing around the mezzanine in a design that symbolizes the confluence of the Danube and Sava rivers. Its dynamic form reflects movement and unity, creating a striking focal point that enhances the opulence of the lobby.

In the ballroom, we designed a breathtaking sculpture made of thousands of hand-blown crystal spheres. These spheres form monumental waves that ripple through the space, evoking both fluidity and grandeur. Together, these bespoke installations underline the St. Regis Belgrade's dedication to craftsmanship, culture, and timeless design.
