

Waldorf Astoria Rome Cavalieri

La Pergola

Rome, Italy

In the heart of Rome, at the exclusive three-Michelin-starred restaurant La Pergola within the Waldorf Astoria, our bespoke lighting installations elevate the dining experience to a realm of unparalleled luxury. Combining traditional Czech craftsmanship with innovative design, we created a breathtaking centerpiece of hexagonal crystal prisms, crafted from mouth-blown Bohemian Crystal. These prisms, with their precision-cut surfaces, capture and refract light, filling the space with a soft, shimmering brilliance that complements the restaurant's refined ambiance.

To enrich the atmosphere further, illuminated blade-like panels of ribbed optical glass are suspended from the ceiling. Their textured surfaces, adorned with glowing bubbles, create a dynamic interplay of light and shadow, adding depth and sophistication to the space. Alongside these sculptural elements, we crafted a collection of freestanding and table lamps, each with brass bases finished in a custom patina. These pieces embody timeless elegance and seamlessly harmonize with the restaurant's impeccable interior, showcasing the breadth and versatility of our bespoke creations.
