With natural green as the main theme, the overall design features ultra-modern 45-degree cut elements. The island, bar counter, and door panel elements echo each other, creating a harmonious and non-conflicting outline of the cabinets.

MASTER BEDROOM

Accentuated with touches of subdued green against a backdrop of elfin gray, the bedroom exudes elegance and warmth.

MASTER BEDROOM WIC

The metallic luster adds texture, and interplay of light and shadow enriches the spatial depth, merging the dynamic with the static.

LIVING ROOM

The clever design from curved styling, plus the integrated design of door panels and handles, achieves maximum dual functionality for both proper storage and display.

OFFICE

Complemented by high-quality light gold metal end caps, offering a sophisticated texture for a unique experience.
