

### **CHARPAI COLLECTION - designed by Camilla Lapucci e Lapo Bianchi Luci**

The Charpai collection is inspired to the tradition of the East, with shades that bring to mind the colorful souq, markets of the old town with floors alternating with different colors of hand-knotted carpets overlapped in layers and walls covered with containers of fragrant spices. The processing of wood components is here reviewed as a simplification in essential forms that take inspiration from everyday objects. A natural wood version with mattress completes the collection.

### **Cipiuelle**

Camilla Lapucci and Lapo Bianchi Luci, the first architect and the other designer, have been working together since 2002 to explore different areas, ranging from architecture to interior design, from art direction to graphic design. The different individual previous experience in prestigious Architecture firms in Florence have merged into a common path that has allowed them to begin an intense collaboration with the world of interior design and wellness dealing with architectural and interior design projects at national and international levels. Each project is conceived through a careful choice of materials and surfaces, volumes, solids and voids in a mutual relationship. Concerning the SPA projects, they have received several awards and prizes, including the 1st prize in the Grand Prix Casalgrande in 2007 and a special mention at the Wellness Design Awards 2008.

### **“Garden living” by Il Giardino di Legno**

The trademarks of the collections by “Il Giardino di Legno” are the attention to details, the use of materials worked with the higher skills and the plot between innovation and tradition. Thanks to the partnership between different companies and the continuous presence in international events, the brand is today distributed in over 50 countries throughout the world, from the USA to Japan. It has become a leading player in outdoor furniture market. The important know-how acquired throughout the years and the ability to manufacture specific items for any different design reality has led to continuative partnerships with important architectural and design firms to realise high-profile projects all over the five continents.
