

Il giardino di legno

ORIGAMI COLLECTION - design by TOM.MY

There is a small table born from the imagination of a child, created with hands that fold paper into a game of shapes, colors, and dreams. Every corner, every crease, is a discovery. An origami table, a corner of the world built with sheets of paper that tell invisible stories. The table is a symbol of creative strength, as if each fold has the power to hold the laughter of a summer day. And so, under the sun, the teakwood side table comes to life. Proposed in mahogany wood finishing.

“Garden living” by Il Giardino di Legno

The trademarks of the collections by “Il Giardino di Legno” are the attention to details, the use of materials worked with the higher skills and the plot between innovation and tradition. Thanks to the partnership between different companies and the continuous presence in international events, the brand is today distributed in over 50 countries throughout the world, from the USA to Japan. It has become a leading player in outdoor furniture market. The important know-how acquired throughout the years and the ability to manufacture specific items for any different design reality has led to continuative partnerships with important architectural and design firms to realise high-profile projects all over the five continents.
