Modern CRAFT INTERIOR

We believe that design should not only serve beauty but also the planet. Our woven wall panels empower local artisans, reduce reliance on synthetic materials, and offer architects and designers a sustainable solution that enriches both living spaces and cultural heritage.

FEATURE SCREEN BASILAIN

www.maisonnrcraft.com

Handcrafted from natural sedge, jute, and responsibly sourced timber, the wallcovering redefines eco-conscious living by combining artisanal weaving traditions with modern modular design. Each panel celebrates the textures of nature while delivering functionality as a customizable interior feature. Bringing light, shadow, and character to any space.

COLOR CUSTOMISATION

The eco wave wall underscores three key commitments of Maison Craft:

- Sustainability – biodegradable natural fibers and timber, reducing environmental impact.
- Cultural Preservation – supporting rural Thai weaving communities through fair trade practices.
- Design Innovation – modular panels adaptable as wall features, partitions, or acoustic elements, tailored to luxury interiors, hotels, and eco-conscious projects.

FEATURE ARTWORK NATHAN

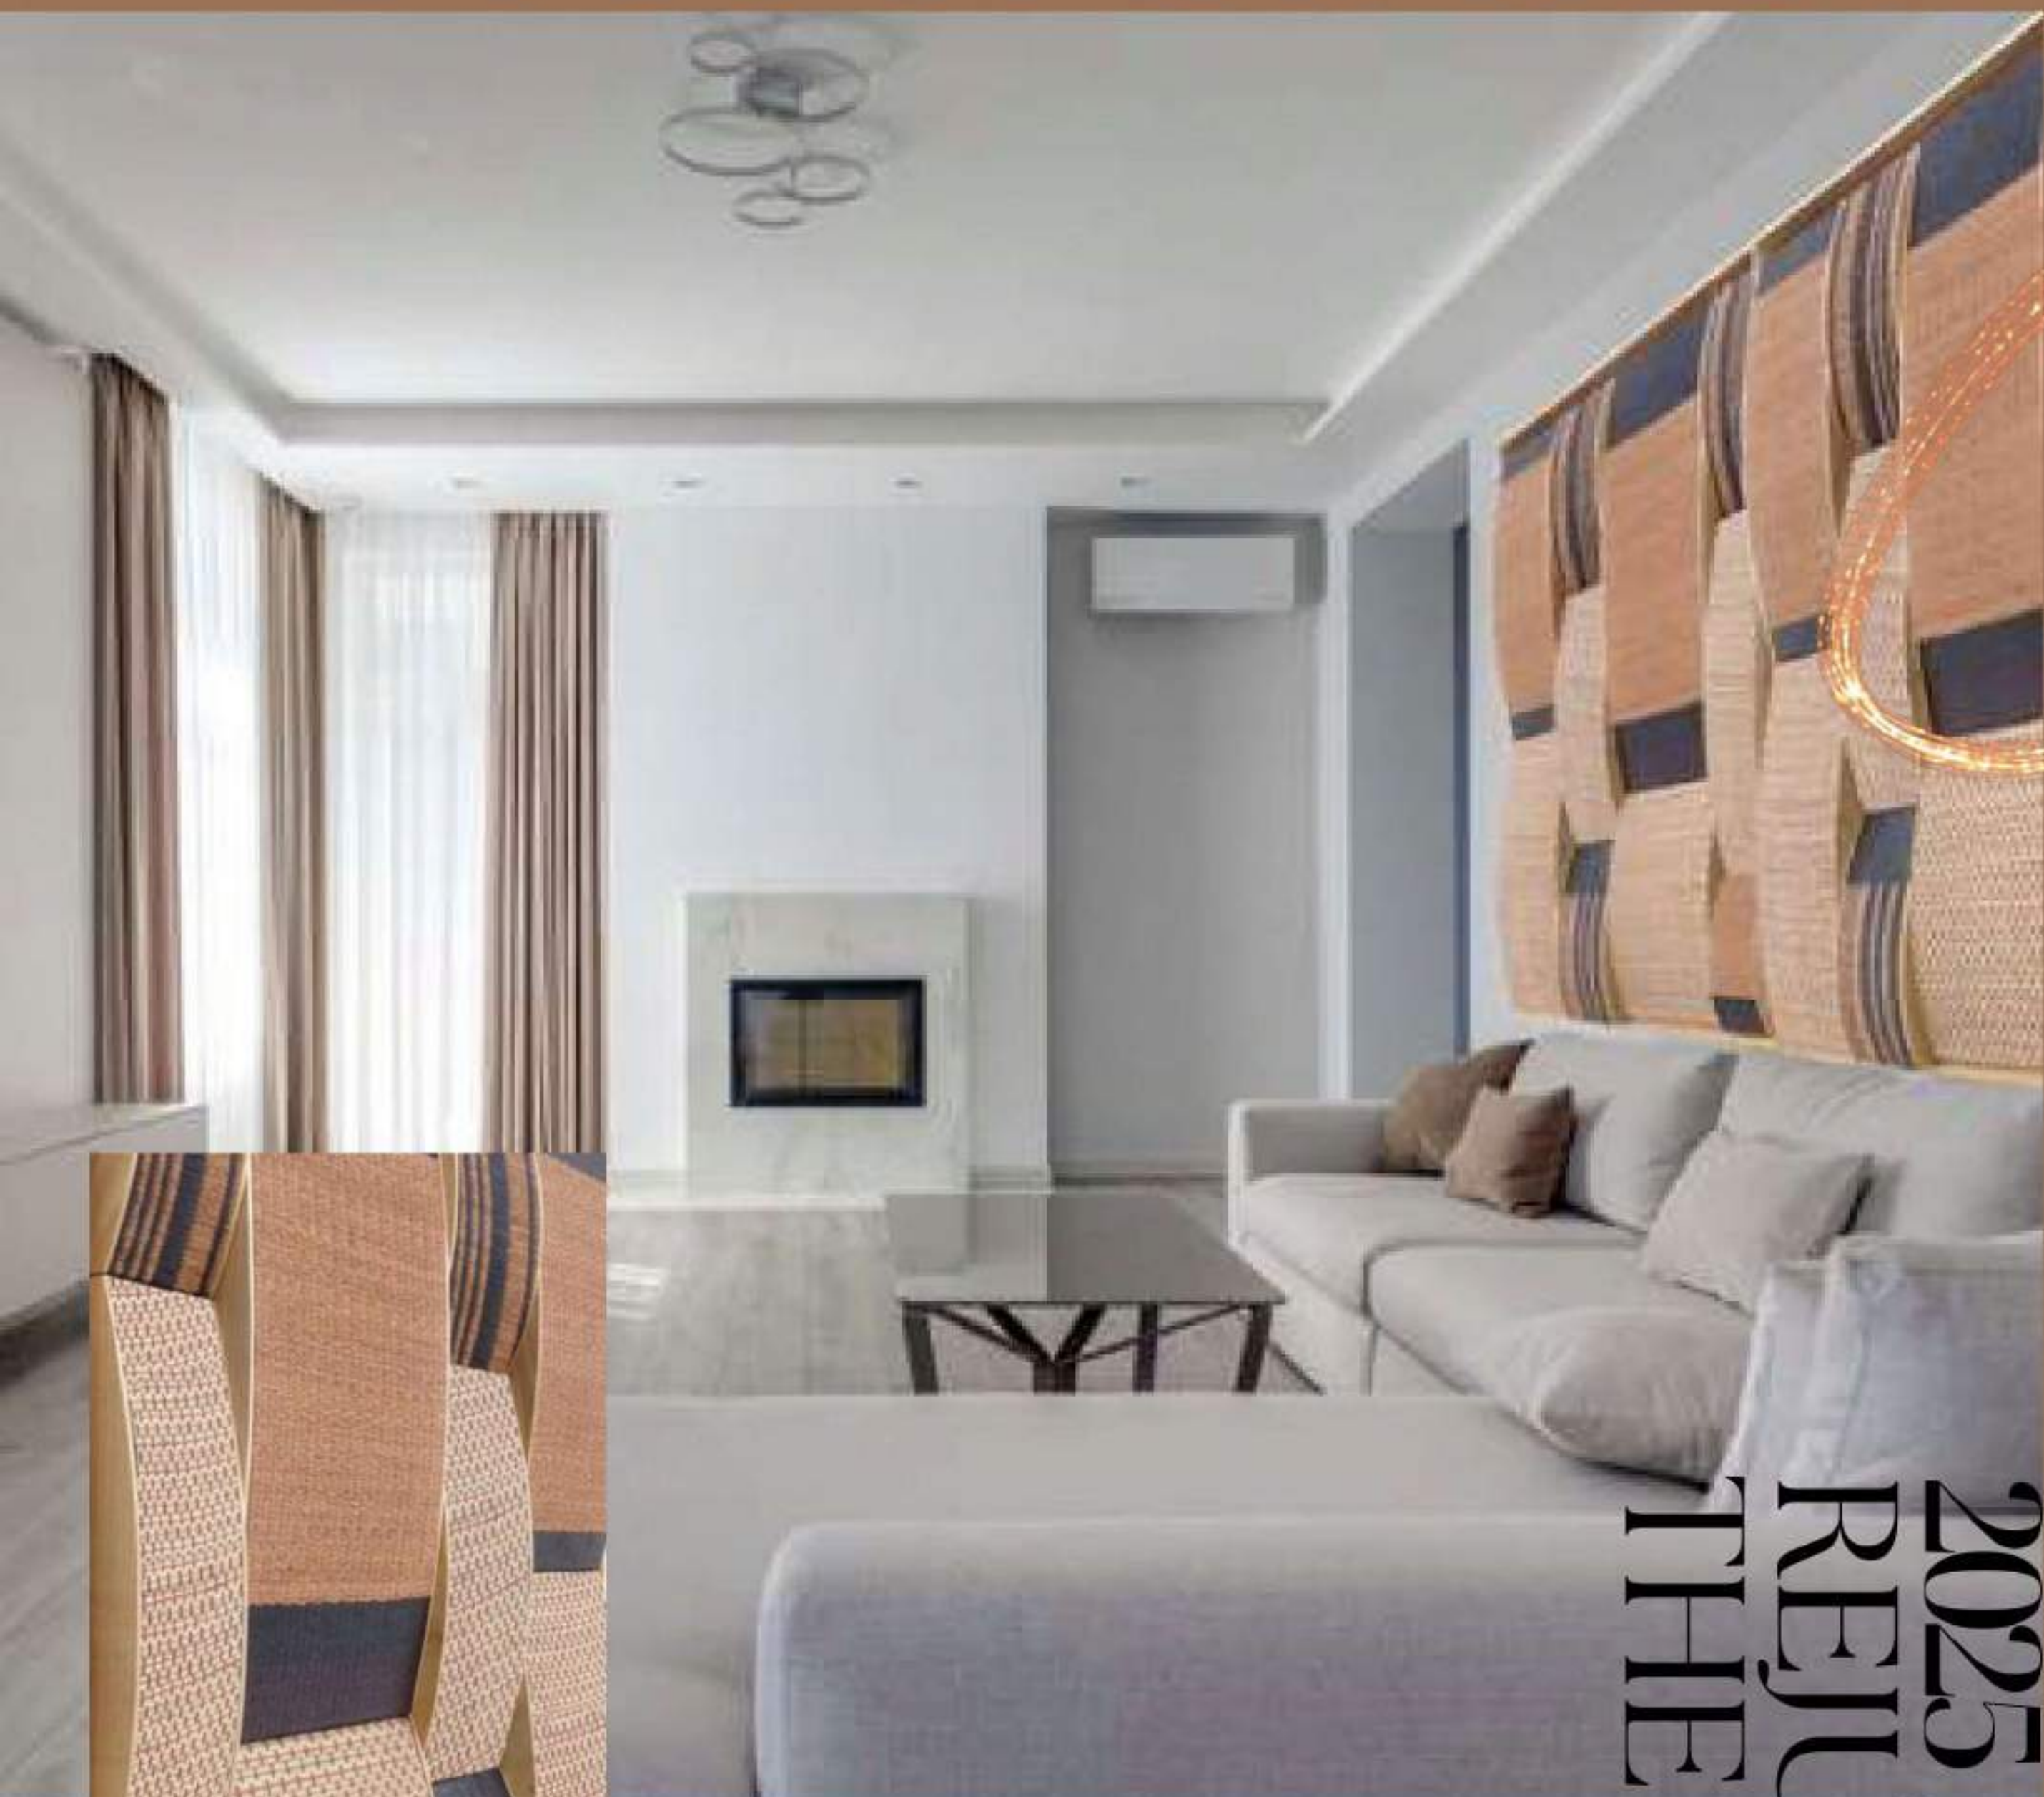

www.maisoncraft.com

Handwoven from natural sedge, jute, and timber, the panels combine Thai artisan traditions with modern modular design, creating sustainable wall features that play with light, shadow, and texture. More than decoration, the project supports rural weaving communities while offering architects and hotels a green building material that blends aesthetics, culture, and eco-conscious innovation.
