

## Meet WAAS by GI AQUA Tech at Global Water Expo Riyadh – Booth 2D141

### Discover the Future of Water-as-a-Service at Global Water Expo

 Riyadh International Convention & Exhibition Center

 02–04 September 2025 |  Booth 2D141

GI AQUA Tech is proud to invite you to visit our booth at this year's **Global Water Expo in Riyadh**, where we will be showcasing the full power of **WAAS – Water as a Service**: a bold, modular, and mobile approach to decentralized wastewater treatment.

From **domestic and commercial developments** to **poultry, slaughterhouse, and concrete wastewater**, WAAS offers **plug-and-play treatment units** that require **no capital investment** or infrastructure: fully operated, maintained, and monitored by our team.

Whether you're a municipality, developer, or industrial player, WAAS empowers you to:

- **Rent advanced treatment units** with zero ownership burden
- **Achieve environmental compliance effortlessly**
- **Reclaim and reuse water** to support sustainability goals
- **Upgrade capacity instantly** without plant overhauls

Join us to see how WAAS is reshaping the industry — fast, flexible, and future-ready.

And while you're there, don't miss a glimpse of our latest innovation: **Sludge Plus**, a specialized unit focused on transforming sludge from treated wastewater into usable, value-added products.

We look forward to welcoming you at **Booth 2D141**.

For private meetings or technical demos, feel free to reply to this email to schedule a session with our team.

**Together, let's build the future of water.**
