

(YWP) AL-YAMAMA WATER PROJECTS

ABOUT AL-YAMAMA WATER PROJECTS (YWP)

Since

1952

Al-Yamama Water Projects is one of the first and oldest specializations of the water department within the Yamama Group, which is considered a leading company in the field of water networks, treatment plants, desalination stations, and irrigation. The group has the capability to implement all types of water supply facilities and infrastructure. Our experts at the Yamama Group focus on improving the performance of the natural environmental system using the latest technologies in the field of sewage and solid waste management, to enable greater health and create a healthy environment for all living beings in a safe manner.

Our Mission

The company is committed to implementing professional standards in risk management, safety, environment, and quality management, aiming to adhere to professional standards and meet timelines in accordance with client requirements.

Our Vision

Our vision is to strive for excellence in all our areas of operation to be recognized as an exceptional company known for its execution ability and commitment to customer satisfaction, especially in water projects.

Our Values

- Achieving global standards in terms of quality and on-time project delivery.
- Providing innovation and offering solutions to enable efficiency.
- Supporting continuous improvement through outstanding performance.

OUR PHILOSOPHY

The company's philosophy acts as a compass that guides us as we aim to make a positive impact through sustainable water projects.

We are committed to creating a better future through our work.

- Commitment to Sustainability.
- Innovation and Excellence
- Community-Centric Approach
