| About Alqotr

► About Alqotr

- Alqotr Company has launched & established as Saudi company since 2004.
- The company provides advanced solutions in engineering consultancy, geospatial surveying, urban planning, and managing, integrating, and disseminating large-scale geographical data.
- Comprehensive services are also offered for municipalities and various utility sectors.

The company has gained the good reputation through Our qualified staff by successfully managing large, intricate projects, technical proficiency, high-quality services, and exceptional customer support.

► The role of Alqotr Company in achieving the Kingdom's Vision 2030

Alqotr Company provides a Vital & significant role in realizing Saudi Arabia's Vision 2030 by offering innovative and advanced engineering services and solutions.

Its vision aims to align with the national objectives and contribute to the overall development of the Kingdom through:

- Enhancing the quality and efficiency of the provided services .
- Digitizing infrastructure Data and services.
- Training and developing local talent.
- Collaboration and partnership with the major organizations and companies.
- Enhancing the role of e-government.

► Our Goal

— We seek to achieve continuous development in all engineering fields by investing in modern technology and techniques, developing human resources, and exploiting artificial intelligence technology in the best possible ways.

► Our Mission

— To provide engineering and consulting services that align with the highest international quality standards, contributing to enhancing client satisfaction and efficiently meeting their requirements professionally and accurately.

► Our Values

— Professionalism: Excellence in business performance in accordance with the highest international standards.

Passion: The main support for providing innovative, creative solutions.

Development: Staying updated with the latest technologies, equipment, and software ensures our clients receive an exceptional experience.

Team spirit: We always embrace teamwork to fully invest our energy in serving our clients.

| Our Services

► Our Services

- **1 Geospatial Surveying**
- **2 GIS**
- **3 Technical Support**
- **4 Urban Planning**
- **5 Digital Transformation**
- **6 Consulting**

1 Geospatial Surveying

► Mobile Mapping System: (MMS)

- Road, Railways, Pipelines corridor survey and management.
- Smart city mapping or modelling.
- Optical (pollution or Distortion) Survey.
- Asset management survey.
- Topographic mapping.

► Aerial Surveying:

- LiDAR Survey.
- True Orthophoto.
- DEM/DSM/DTM.
- Aerial Photography and videography.
- Inspection.
- Monitoring.
- Disasters Management.
- Agriculture Applications.
- Projects stages updates.

► 3D Laser Scanning:

- Buildings Architectural As-built Survey & 2D Plans.
- Archeological & Historical Documentation.
- Simulations.
- Deformation Analysis.
- Volume Calculations.
- Building's facade survey.
- Modelling for pipes for big gas stations.
- Steel structures survey and BIM modelling.
- Storage tank calibration and deformation analysis.
- Buildings and wall verticality checks.
- Floor flatting analysis for factories & big floor areas.

► Infrastructure and Subsurface Surveying (GPR)

- ▶ **Metallic objects:** Metal reinforcement in concrete, buried pipes, underground storage tanks, and anything made of metal.
- ▶ **Non-metallic utilities:** Plastic pipes, ceramic pipes, fiberglass pipes, and PVC conduits.
- ▶ **Concrete structures:** Voids, cracks, delamination, rebar spacing, and thickness variations in concrete structures such as bridges, pavements, and buildings.
- ▶ **Soil variations:** Changes in soil density, moisture content, and compaction, which can indicate underground features like voids, tunnels, or buried objects.
- ▶ **Rock and bedrock features:** Fractures, voids.
- ▶ **Utilities:** Underground cables (e.g., electrical, communication), water mains, sewer lines, and drainage systems made of various materials.
- ▶ **Environmental hazards:** Underground storage tanks, contaminants, and waste materials that can pose environmental risks.

► Land Surveying Services:

- Cadastral Mapping.
- Topographic Survey.
- Physical Demarcation.
- Volumetric survey.
- Plans Validation.
- Title Deeds Studies.
- Urban (Visual) Survey.
- Validation Master Plan.

► Marine Survey:

We provide specialized hydrographic, bathymetric and geographical survey services that cover a broad variety of hydrographic disciplines.

Whether it be offshore or near shore – we have them both covered.

we pull the industry experts to our roof.

We as a professional we have a strong association in global range.

state-of-the-art technology and software, empowering us to deliver an exclusive, tailored data resolution to your specific needs.

Survey systems are selected based on the scope of work, water depth, operating frequency, range from shore, accuracy requirements, seabed conditions, and size of vessel

- MULTIBEAM & SINGLE BEAM BATHYMETRIC SURVEY
- MARINE GEOPHYSICAL SURVEYS
- TIDAL OBSERVATION
- MARINE ENVIRONMENTAL SURVEYS

2 GIS

► GIS Services

- ▶ Smart solutions for spatial data integration.
- ▶ Workflow automating and tasks digitalization between departments that rely on spatial data.
- ▶ Building spatial applications and dashboards based on spatial data.
- ▶ Maintaining and updating geospatial databases.
- ▶ Developing geospatial data portals and applications.
- ▶ Digital maps and Spatial Planning Designs.
- ▶ Geospatial analysis.
- ▶ Transfer and digitizing services from multiple sources.
- ▶ Maps Digitizing.
- ▶ Creating “topographic” spatial models (DEM/DSM/DTM).
- ▶ Classification/enhancement/for satellite and aerial images and their applications.
- ▶ Extracting geospatial features using traditional methods and artificial intelligence techniques.
- ▶ Producing various maps (real estate, topographic, geological, internal, thermal, features and facilities).

3 Technical Support

► Technical Support Services:

- Survey Crews.
- Qualified Technicians and Engineers
- GIS, Surveyors, Urban planners, Geomatics engineer).

4 Urban Planning

► Geospatial Surveying:

- Regional & Strategic planning.
- Master planning.
- Urban design.
- Detailed planning.
- Environmental & sustainable planning.
- Landscape Architecture..

5 Digital Transformation

▶ Digital Twin:

- ▶ Smart Cities Modeling and management.
- ▶ Smart assets Management.
- ▶ Digital Twins Platforms.
- ▶ Projects life cycle.

► Virtual Reality Tours:

- 3D virtual tours go beyond traditional ways by transforming your facilities into valuable data.
- With features like detailed layouts, informative labels, precise measurements, and comprehensive analytics, our advanced virtual tours services provides instant access to powerful insights that can revolutionize the way you interact with your facilities.
- It is considered now as the most accurate, advanced, and highest fidelity 3D representation of any location or object, all produced by bleeding edge technology systems and top of the line imagery equipment. Also, a Dollhouse view pictures for any building, interior, or office space can be generated easily from the space digital twin.

► Building Information Modeling (BIM):

- Scan to BIM.
- Documentation – Historical Buildings.
- Condition Assessment.
- Maintenance Program.
- Pipes modeling for factories, Power & energy stations and petrochemical plants.

6 Consulting Services

► Due Diligence Services:

- Analyzing the site
- Legal and regulatory review.
- Market analysis.
- Financial analysis.
- Risk assessment
- Stakeholder Engagement

► Environmental Assessment:

- The impact of the program is significant.
- Environmental Site Assessments.
- Hide and seek.
- Ecological environmental assessments.
- Hydrology and risk assessment.
- Environmental training and awareness programs.

▶ Asset Management:

- ▶ Expropriation of land in the country.
- ▶ Land management solutions.
- ▶ Recording, categorizing and updating land data.
- ▶ Asset management.
- ▶ Visual scanning of land and assets.
- ▶ Providing government transactions.
- ▶ Preliminary real estate studies and valuations.
- ▶ Develop and modify customized applications for land management agencies and government departments.

| Our Projects

The project name:

The entity/organization:

– Aerial Photography Project for Agricultural Areas	Qiddiya Investment Company
– Creating a Base Map and Geospatial Platform	Asir Municipality
– Surveying and expropriation works in the city of Abha	Wadi Development Company
– Topographic Survey Project in Al-Bujairy Area, Diriyah	Diriyah Gate Development Authority
– Engineering Consulting Services for Surveying Accuracy and Quality Control for the Municipality of Al-Madinah Al-Munawarah Region	Municipality of Al-Madinah Al-munawarah
– Land Survey Services Project for Land Acquisition Development in The New Square (Development) Project	The New Square
– Surveying and expropriation works in NEOM city	NEOM
– Providing Surveying Consultancy Services for Dams in Various Regions of the Kingdom	Ministry of Agriculture

The project name:

The entity/organization:

– Cadastral surveying and property expropriation works in the city of Mecca	Haram Vision Company
– Saudi Electricity Company Project	Saudi Electricity Company
– Topographic and Hydrological Study in Hail City	Ministry of Defense
– Framework Agreement Project for Cadastral Surveying Services	Real Estate Register
– Cadastral Surveying and Parcel Subdivision Services Project	Ministry of Health
– Technical Support Project for Qiddiya	Qiddiya
– Topographic Survey Project for Landscaping the Northern Ring Road	Royal Commission for Riyadh City
– Engineering Consulting Services for Surveying Accuracy and Quality Control for the Municipality of Al-Madinah Al-Munawarah Region	
– Topographic Survey Project for Landscaping King Salman Road, King Khalid Road, and Jeddah Road	Ministry of Tourism

The project name:

The project name:

The entity/organization:

– North Riyadh Real Estate Study Project	Public Investment Fund (PIF)
– North Riyadh Land Study Project - North Pol	
– Surveying the study properties located within the King Salman City project	
– DQ - Land Survey project west of Riyadh city	
– Real estate study and GIS project in North Riyadh	
– Property study and GIS project in West Riyadh	
– Real estate study and GIS project in King Salman Industrial Zone (Glory)	ROSHN Real Estate Company
– Jeddah Survey and Krookies Validation Project for unplanned land	
– Surveying and demarcation of some of the Ministry's land sites	
– cadastral survey of some state property sites for the Ministry of Finance	
– Technical support for surveying and cadastral works for the sites and buildings of the Saudi Commission for Tourism and National Heritage (SCTH)	Ministry of Housing
	Alalam Information Security Company
	Ministry of Culture

The project name:

- Preparing Refinement plans for private and governmental plans for villages and hamlets of Riyadh region - Riyadh Municipalities Agency
- Urban survey and Structural Plans Study in Al-Quwaiyah - Riyadh Municipalities Agency
- Preparation of the preparatory plans for the approved plans in Al-Muzahmiyah - Riyadh Region Municipalities Agency
- Preparing cadastral drawings and Refinement plans for the high grant lands in Bahir Al-Khair - Land Agency
- Preparing cadastral survey and updating compensation plots and plans - Land Agency
- Preparing refinement plans for the centers of Al-Jamsh Municipality and some centers of Riyadh Region - Riyadh Region Municipalities Agency
- A consultancy project to inventory and document dilapidated, deteriorating, and abandoned buildings
- Urban Surveying Works and Structural Plans Study Project in Huraymila

The entity/organization:

Riyadh Region Municipality

The project name:

- The project of cadastral lifting and approval of plans in the Makkah region
- Draft preliminary study to determine the suitability of the site for the development of UJL communities
- Jeddah Airport Land Project (Environmental Studies. Hydrological
- Renaissance Project in Jeddah with an area of 44 million m2
- King Abdulaziz Road Jeddah Spine Project
- Surveying and adopting the structural plan in Hofuf
- Project of cadastral elevation and approval of the structural plan in Qatif
- Prepare a structural land subdivision plan for 12 millions m2 land of Roshn Real Estate Company at the airport
- Preparation of preliminary studies for the SEDRA Project 6.7.8
- Preparation of SEDRA Plots (1,2,3,4,5) for the Structural Plan No. (3944)
- Topographic Survey Project and Removal of Informal Settlements in Roshan
- Survey Project to Removal Informal Settlements in Roshan

| – Framework Agreement Project for Cadastral Surveying Services | ----- | |
| – Cadastral surveying Project - SABIC | ----- | SABIC |
| – Survey lifting in Zulfi, Majmaah, Harimla, Ghatt, and Rumah | ----- | |

► CORS STATIONS INSTALLATION PROJECT

The project aims to produce an updated base map that is produced through comprehensive cadastral survey of all roads, services and buildings in the city of Abha and the villages and centers affiliated to it.

200 Points

geodetic points to assist in updating base maps, 200 control points (GCPs)

CORS Stations 4

continuous monitoring stations for installing serving Abha and its surrounding centers

► North Riyadh Land Project

Cadastral reports

► Due Diligence of land plots along King Abdulaziz Road

The objective of the project was to assess the vacant lands (about 532 lands) located along King Abdulaziz Road in the city of Jeddah, to decide on the feasibility of utilizing these lands by studying the urban and environmental characteristics of each sector with a SWOT analysis, An assessment of the current state of:

- Identify all vacant lands in the project area by collecting available information from the concerned authorities and visiting the site.
- Meeting with all relevant stakeholders to ensure all information is gathered.
- Identify and define urban variables (aspects of location, surrounding land uses, potentials, connectivity, exposure, building patterns).
- Identify and define urban variables (aspects of location, surrounding land uses, potential, connectivity, exposure, building patterns).
- General site hydrology and drainage study.
- Determine the extent to which plots can be developed

► Land acquisition in Abha center

- Laser scanners Drone

| Our Team

► Team Work:

Our team is characterized by efficiency and experience in managing various projects as we focus on credibility, quality and commitment during all phases of the project. Our team's expertise in managing stakeholder relationships ensures smooth coordination and adherence to project timelines. Continuous training is an essential part of our approach to developing our team and keeping them up to date with the latest developments in the industry. This commitment to continuous development establishes an innovative team capable of delivering quality solutions to all our clients.
