## ABOUT COMPANY

We are a one-stop sales and service center for Industrial IT, Networking, and Industrial Automation products in GCC. With more than two decades of expertise and a wide range of industry-leading products from world-leading vendors, STAR TECH's experienced team is able to support your requirements in a range of industry verticals from Intelligent Transportation to Smart Cities, Smart Manufacturing, Water and Wastewater, Power and energy, and Oil & Gas.

Our key partners are Advantech, Durabook, Getac, Neousys, Redlion Controls and NavigateWorx. We have been Advantech's longest-premier partner in GCC for over 20 years. STARTECH can support you with the best service and pricing, with distribution across Bahrain, Kuwait, Oman, Qatar, Saudi Arabia, and in UAE.

STAR TECH is your one stop shop for Industrial IT, Networking and Automation Products & Solution in GCC. We have more than 20 years of professional experience on distributorship, training and technical services to support our customer requirements in various industries like Oil & Gas, Power & Energy, transportation, Water and Waste Water, Manufacturing

## VISION

Improving the quality of life in GCC by increasing efficiency and enhancing quality of industries and infrastructure.

## MISSION

Providing State of the Art Industrial IoT, Communication, Control & Computing Solutions While offering High Quality Services.

# INDUSTRIAL IT PRODUCTS

- **EDGE WORKSTATION & SERVER**

- Rackmount and Desktop PC
  - Modular IPC
  - Server & NAS
  - IEC - 61850 - 3 Certified PC/ Server

- **EMBEDDED PC**

- In vehicle and Extreme Rugged PC
  - Compact PC
  - NVIDIA Fanless GPU Computer
  - AI Powered Industrial PC's

- **PANEL PC**

- Modular Panel PC
  - Zone 2 Certified Panel PC
  - All in One PC

- **RUGGED LAPTOPS & TABLETS**

- AI Powered Rugged Devices

## INDUSTRIAL IT

STAR TECH offers a wide range of expertly configured industrial IT solutions for Industrial applications. By creating value-added, standard product solutions and by offering customization, STAR TECH can provide platforms to meet any requirements.

# INDUSTRIAL AUTOMATION PRODUCTS

- REMOTE I/O MODULES
- INTELLIGENT GATEWAYS & RTU
- WIRELESS I/O MODULES
- ADVANCED AUTOMATION CONTROLLERS
- HMI & CONTROLLERS
- PANEL METERS

## INDUSTRIAL AUTOMATION

In these categories, we provide not only hardware such as: embedded automation computers, automation controllers, remote I/O modules, industrial Ethernet and wireless and data acquisition, but also software applications such as automation software, and building energy management software. Furthermore, we also provide products with industry certification such as Class 1 Division 2 (ATEX), IEC-61850, EN-50155 and more, so as to meet the needs of different markets and regions.

# INDUSTRIAL NETWORKING PRODUCTS

- UNMANAGED & MANAGED SWITCHES
- ADVANCED LAYER 3 SWITCHES
- POE & POE+ SWITCHES
- MEDIA CONVERTERS / POE EXTENDER / SPLITTER
- INDUSTRIAL 4G/5G ROUTERS
- SFP TRANSCEIVER
- INDUSTRIAL WIFI & LoRa GATEWAYS
- PROTOCOL GATEWAY

## INDUSTRIAL NETWORKING

Industrial Networking offers a comprehensive line of industrial Networking solutions to meet the needs for mission critical application for different industries. Our product portfolio includes L2 & L3 Switches, Managed and Unmanaged Switches, POE/POE+, EN50155 / IEC61850 / IP65 / IP67 Switches, Serial Device Server and Protocol converters, 4G/5G Gateway, Wireless Access point and etc.

# INDUSTRIAL IIoT SOFTWARES

- WISE -Paas / IoT CLOUD PLATFORM
- Web Access / NMS
- Edge 365 / Device on
- IIoT SUITE / DASHBOARD
- iEMS / HVAC
- iFACTORY / OEE

## IIoT SOFTWARE PLATFORM

WISE- Paas (Platform as a service) is an IIoT cloud platform which provides wide range of services including Edge Intelligence, Cloud data collection, Data analysis and Dashboard Visualization. It integrates field IIoT devices and sensors to the cloud paves way for IT/OT convergence and digitalization.

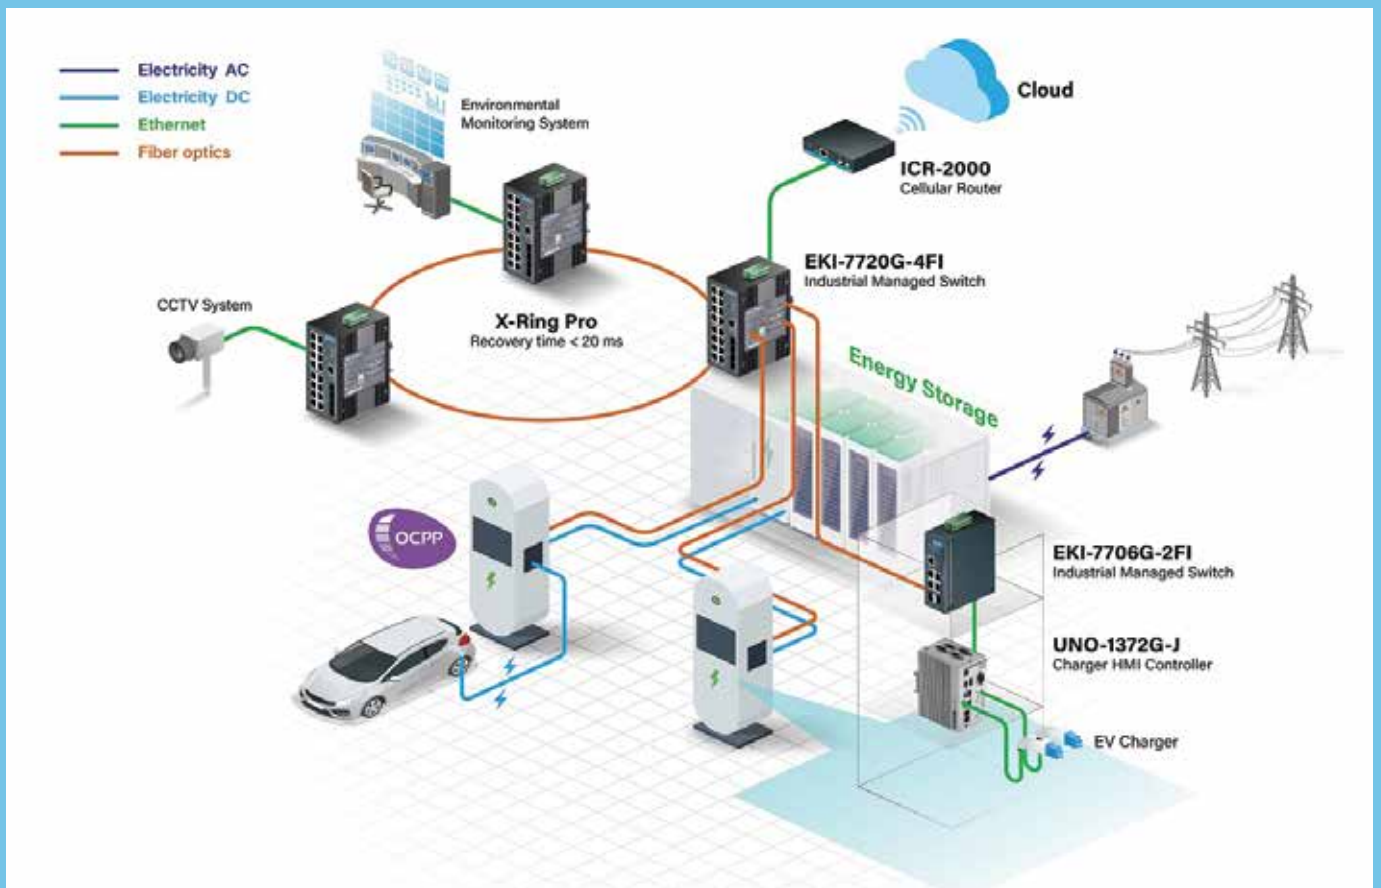

# SOLUTIONS

## INDUSTRY 4.0

Industry 4.0 exerts its greatest impact on production, and that the companies surveyed have also developed varied methods and procedures. These can be termed first category when sensors are built into a machine, and sensors are incorporated into the process of monitoring a production process and indicating deviations from it. The second level and category of digitalization of production processes occurs when machines are a coherent network, as, for example, in an easy-to-adapt, flexible monitoring system (FMS).

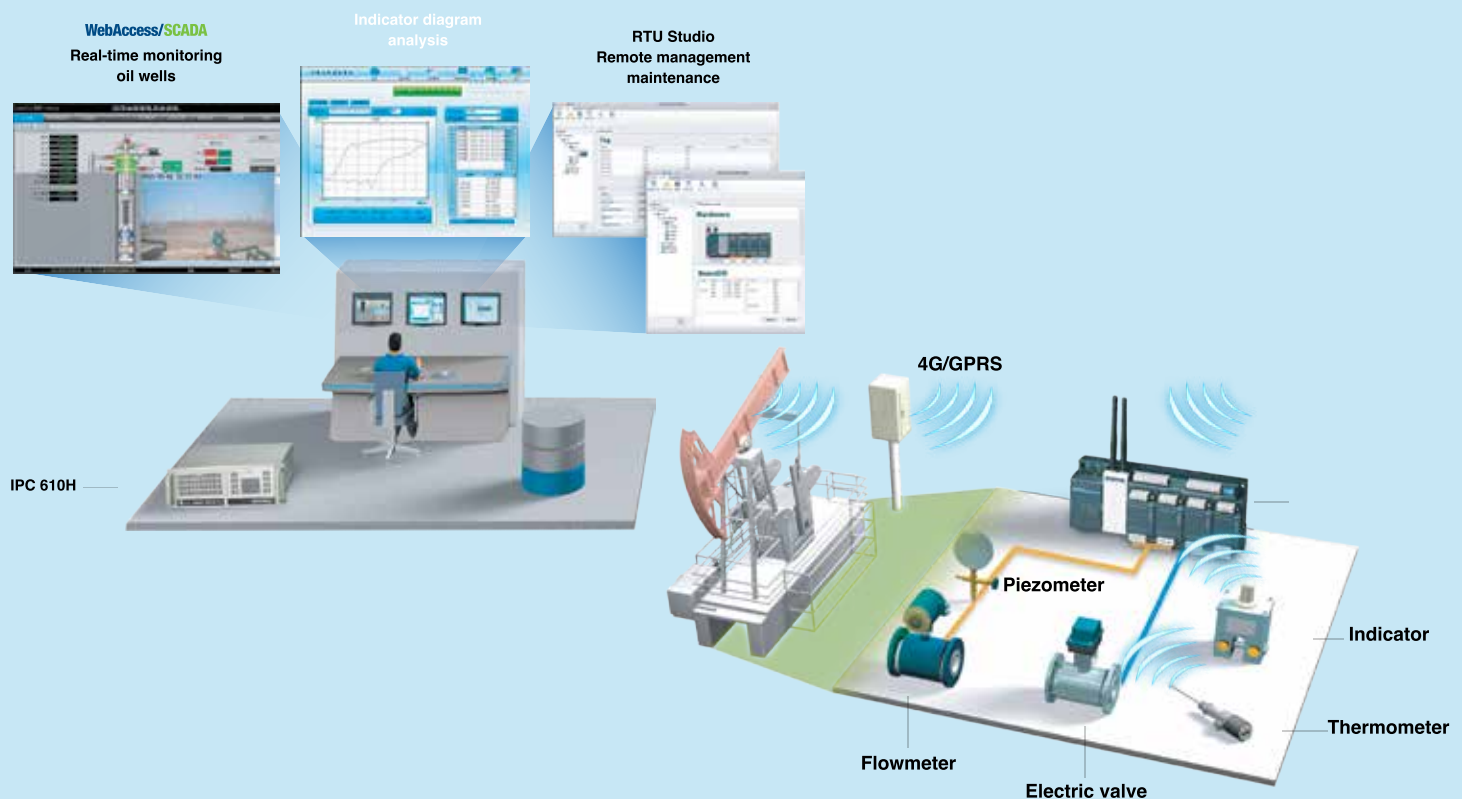

## NETWORK MANAGEMENT

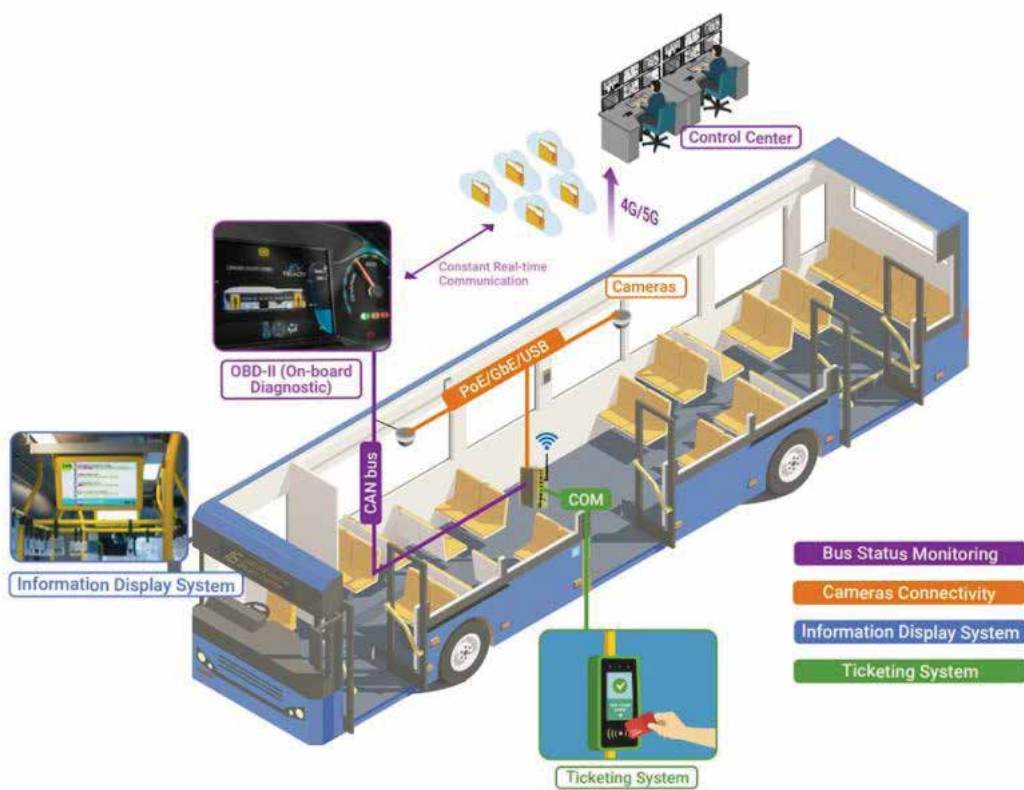

Network switches can be web browser enabled by Network Management software package. A synthetic platform developed for monitoring, setting and maintaining devices via IP-based network. Includes Device Management, variety of Ring topologies, Alarm Management, Efficiency Management, Topology Management and System Management.

# SOLUTIONS

## WELL-HEAD MONITORING

Remote monitoring and control enables the petroleum company to improve pump efficiency, uptime and productivity. With analog acquisition speeds of 25ms/channel and Mean Time Between Failures (MTBF) of more than 450 thousand hours, Our RTUs provide fast, reliable data logging and collection. It reliably delivers field information in real time , Enables more control over operations , Drives productivity and improves overall efficiency, Optimizes performance and helps to prevent hazards.

## INTELLIGENT TRANSPORTATION

Fleet management systems allow fleet operators to remotely track vehicles using realistic maps and views generated from Global Positioning System (GPS) data. This advanced technology increases fleet management effectiveness and efficiency by reducing workload and overall transportation and staff costs. Our military & industrial grade switches, laptops and tablets help our customer to implement the best fleet management in public and private transportation and even defense sectors.

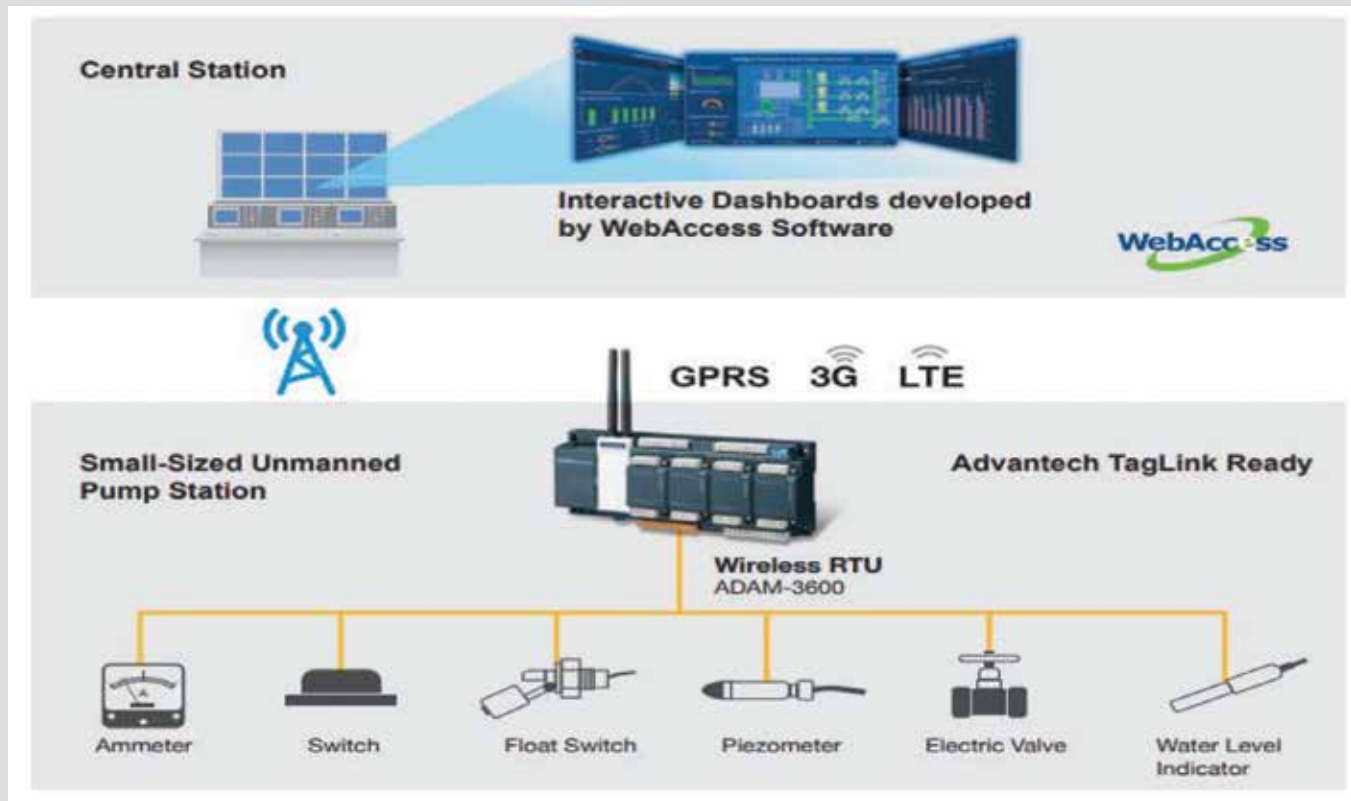

# SOLUTIONS

## WISE- PAAS / IIOT PLATFORM

WISE-PaaS/IIoT is based on the WebAccess Industrial IoT so designed to connect partners, cultivate the co-development of vertical solutions, by leveraging the WISEPaaS/IIoT and WebAccess platform and solutions, partners will be able to shorten their project life cycles through utilizing the integrated solutions, derive competitive advantages through enhanced technical expertise, as well as boost profits and revenues through co-marketing activities.

## REMOTE PUMP MANAGEMENT

Remote monitoring usually requires considerable efforts from System integrators and time for testing and integrating different devices with different brands. This Solution ready package from Advantech is suitable for the remote monitoring and control of pump station of varying size. Advantech's browser based HMI-SCADA software WebAccess is a 100% web based SCADA software solution that also serves as an IIoT platform by providing open interfaces for developing IoT applications aimed at various vertical markets.

# PARTNERS

The Advantech logo consists of the word "ADVANTECH" in white, uppercase, sans-serif font, centered within a dark blue rectangular box.

*Enabling an Intelligent Planet*

**ADVANTECH** For the Gulf Cooperation Council (GCC), we are the strongest regional supplier of complex industrial automation and computer systems. Through our commitment to providing cutting-edge solutions and great customer support, we enable employers across a variety of industries to optimise their operations, increase productivity, and undergo digital transformations.

The Durabook logo features the word "DURABOOK" in a bold, blue, sans-serif font. The letters are slightly shadowed, giving it a three-dimensional appearance.

**DURABOOK** takes great satisfaction in providing rugged computing solutions designed to withstand the roughest circumstances. As the leading supplier of rugged laptops and tablets, we are committed to delivering exceptional performance, durability, and dependability to meet the needs of professionals across a wide range of industries.

The Getac logo displays the word "Getac" in a stylized, italicized, orange-red font.

**GETAC** is the place to go if you need rugged computing solutions that can withstand the harshest environments. Getac develops cutting-edge technology with a focus on ruggedness, dependability, and performance, empowering professionals across multiple industries. Getac has the expertise and goods to meet your specific requirements, whether you want robust laptops, tablets, or other specialty equipment.

**GUANGZHOU NAVIGATEWORX TECHNOLOGIES CO., LTD** is a dedicated IIoT / M2M Hardware Manufacturer and Solution Provider. Since its establishment on the forefront of the evolving IIoT / M2M Industry, she offers an unique combination of extremely talented Wireless and Wireline Experts to help you navigate the overwhelmingly complicated IIoT / M2M Industry.

**NEOUSYS** are a leading supplier of cutting-edge, industrial-grade computer systems in the global market. We serve a wide range of industries, including automation, transportation, and surveillance, and are committed to developing durable, rugged, and high-performance solutions.

**REDLION** is the place to go for cutting-edge and dependable industrial automation and networking solutions. We offer cutting-edge technologies and great services with a strong commitment to excellence to meet the specific needs of businesses in a variety of industries. Whether you want to improve data management, network infrastructure, or automation processes, Redlion has the expertise and solutions to help.
