

PRESS KIT

Sonite Surfaces initially started with button production and clothing decorations but has since evolved into a company specializing in creating unique, high-quality, and efficient solid surface coverings, including a wide selection of alternative-material mosaics. By combining advanced technology with creative innovation, Sonite has been pushing the boundaries of surface and interior design with its polymer mosaics.

The materials produced by Sonite, including custom surface coverings and mosaics, are truly innovative in today's design industry. Skilled artisans leverage cutting-edge technology to offer a variety of textures, patterns, and colors for effortless integration into any design.

Sonite's collections offer a wide range of visual effects, from the cool shimmer of pearlescent materials to the warmth of eco-friendly options made from coffee grounds, eggshells, coconut fibers, and rice husks. Sonite materials are versatile and can enhance any interior aesthetic.

CERTIFICATES

Sonite is dedicated to eco-friendly design, and we are excited to share our vision with you!

PRESS KIT

SONITE DÉCOR is a combination of our passion for innovation and design and our commitment to the environment. Our main goal is to use eco-friendly advanced materials to create stunning objects that double as eco-luxury packaging, in line with lower - carbon footprint properties associated with our signature lightweight composites.

We prioritize the transformation of discarded materials such as Husk (rice husks), Cocco (coconut husks), and Talay (ocean-bound plastics) into unique and valuable products via this upcycling process which is an effective waste management strategy while reducing our carbon footprint and greenhouse gas emissions. Thus, helping combat pollution and make a positive impact on our planet.
