

Turn Your Data Into a Custom AI

Opteam

Plan, report and communicate
With your own
custom AI

Your Own Private, Company-Trained AI

Upload all your project data and instantly create a secure, private AI that understands your company's context, history, projects, and workflows. Insights powered by your own data.

Instant Reports, Docs, and Insights on Demand

Generate detailed project reports, documents, and updates simply by asking. Save hours waiting for your team to generate manual reports, instead get accurate responses in seconds with site data.

Real-Time Project and Team Intelligence

Team members submit site updates right from their WhatsApp. Opteam automatically processes this data to give you live dashboards, showing progress, costs, and performance in real time.

For Contractors

Automate site updates, progress tracking, and reporting, reducing admin work by over 70%. Get daily visibility into activities, delays, and costs without waiting for weekly reports.

For Consultants

Receive accurate, real-time data directly from site teams, synced to dashboards and delay logs. Verify contractor updates automatically with AI that compares reported progress to schedule data.
