

Aalberts IPS to Showcase Cutting-Edge Solutions at Big 5 Global 2025 Dubai

Aalberts integrated piping systems (Aalberts IPS), a global leader in designing, engineering and manufacturing advanced integrated piping systems for liquids and gases, is pleased to announce its participation in **Big 5 Global 2025**, taking place at the Dubai World Trade Centre from **24-27 November 2025**.

Big 5 Global is the biggest construction and urban development exhibition in the Middle East, Africa, and South Asia region, bringing together over **2,800 exhibitors**, more than **85,000 industry professionals**, and showcasing upwards of **60,000 innovative products** across all stages of the construction lifecycle.

What Aalberts IPS Will Bring to Big 5

At this year's show, Aalberts IPS will be presenting its full spectrum of integrated piping solutions, combining **valve, connection, fastening, and piping technologies**. Designed to deliver seamless performance, durability, and sustainability across industrial, commercial, utilities and residential sectors.

Highlighted features of Aalberts IPS's exhibit will include:

- **Data Centre Solutions:** Offering robust, efficient piping systems designed for the demand of cooling and fluid management, essential requirements of modern data centres. This enables precise temperature control, minimal downtime, and optimal energy efficiency.
- **HVAC Innovations:** Advanced hydronic balancing and flow control systems such as the Pegler ProFlow PICV, offering superior energy savings, simplified installation, and dependable long-term performance in building services and climate control applications.
- **Sustainable Product Innovation:** Environmentally responsible designs that reduce material and energy consumption throughout the product lifecycle.
- **EcoVadis Gold Medal Recognition:** A testament to Aalberts IPS's leadership in corporate sustainability, ranking among the top 5% of companies globally for environmental, labour, ethics, and procurement performance.
- **Digital-first Design Tools:** including the AIPS Digital Design Service and Revit plug-in, enabling specifiers and engineers to design, configure and specify integrated piping systems from early architectural or mechanical plans.

Why This Matters

The Middle East's surging investment in **data infrastructure, green buildings, and HVAC modernisation** reflects the region's commitment to innovation, efficiency, and sustainability. Big 5 Global offers Aalberts IPS a powerful opportunity to demonstrate how its integrated solutions can reduce installation times, lower lifecycle costs, and meet increasingly stringent environmental standards, while ensuring system reliability in mission-critical applications.

Meet Us At the Show

Aalberts IPS invites architects, engineers, contractors, specifiers, developers, and clients to visit stand Z5 B91 at Big 5 Global 2025. Representatives from Aalberts will be on hand to demonstrate new products, discuss project-tailored solutions, and share insights into how piping systems can contribute to sustainable, efficient, and safe infrastructure.

About Aalberts integrated piping systems

Aalberts integrated piping systems engineers advanced piping infrastructure solutions for the control and distribution of liquids and gases. Operating globally, the company produces fully integrated systems that include valves, connections, fastening and pipe technology. Aalberts IPS is committed to sustainability, innovation, and delivering high performance solutions that are easy to specify, install, and maintain.
