Press Release

Technopanel to Exhibit Innovative Cladding Solutions at The Big 5 Construct Kenya 2025

Riyadh, 19 January 2025

Technopanel, a pioneer in manufacturing fire-rated aluminum cladding panels in Saudi Arabia, is proud to announce its participation in The Big 5 Construct Kenya 2025. As the first company to produce cladding in the Kingdom, Technopanel has been a leader in delivering exceptional quality and innovation since 2006. Visitors to our booth will have the opportunity to explore our advanced solutions for contemporary architectural design, including fire-resistant panels that comply with the highest international safety standards. Our products not only ensure safety but also provide unmatched aesthetics, available in a wide range of finishes, textures, and sizes to suit any architectural need. With a production facility leveraging cutting-edge technology, we are committed to delivering sustainable solutions that meet both local and international market demands. By combining innovation and expertise, Technopanel continues to redefine excellence in building cladding systems.

Headquartered in Riyadh, Technopanel operates from an 8,000 m² facility with a production capacity of 5 million m² annually. We are showcasing our A2 and B1 fire-rated cladding, renowned for durability, resistance to fire, and customizable finishes. These panels are ideal for exterior and interior walls, columns, and architectural features. Our services, such as precision CNC cutting, V-grooving, and cladding customization, enable us to meet diverse project demands with exceptional craftsmanship and efficiency.
