

ArchiUs to Showcase BIM Innovation and Digital Solutions at The Big 5

About ArchiUs

ArchiUs is a BIM and design solutions company specializing in BIM services, design, execution drawings, workflow automation, and custom digital solutions for the architecture, engineering, and construction industry.

ArchiUs will participate in The Big 5 at **Hall 3, Booth G40**, showcasing its latest BIM solutions, digital tools, and workflow innovations. Based in Alexandria, ArchiUs provides BIM modeling, design services, shop drawings, parametric Revit families, workflow automation, and custom software solutions for the AEC industry.

Visitors will experience a live BIM project demonstration, showcasing the company's workflow from concept to execution and how BIM improves project accuracy, coordination, and efficiency.

The booth will also feature an immersive VR experience, allowing attendees to explore the showcased project in a fully interactive virtual environment.

In addition, ArchiUs will present its in-house Revit tools developed using AI, Dynamo, and the Revit API to automate workflows and improve productivity, alongside its proprietary ERP platform for leave management, time tracking, employee requests, approvals, and internal communication.

Visit ArchiUs at Hall 3, Booth G40 to discover live BIM demonstrations, custom digital tools, and an immersive VR experience.
