MEPA
PACKAGING

حلول ميبا لصناعات التعبئة والتغليف

Why MEPA?

- We conduct feasibility studies for you by collaborating with specialized firms.
- MEPA is the market leader in turnkey projects.
- We have over 10 years of experience.
- MEPA has installed more than 20 factories in the Arab world and Gulf Region.
- We at MEPA have the ability and know-how to bring success to your project.
- Highly innovative industrial solutions matching the highest international standards.
- MEPA cooperates with the world's best manufacturers in the field of food and beverage processing.
- Offering the most competitive prices with highest quality standards.
- MEPA helps its clients find suitable funding for their projects.

Overview

Private shareholding
group founded in 2016

Active in Diverse
Business Fields

Operating in the GCC,
the Levant, and Africa

partners

YOU CAN BENEFIT FROM ALL OF OUR SOLUTIONS

We provide a broad range of industrial solutions to new or existing factories in various industrial sectors. Our services include applications engineering, sourcing, supply, delivery, commissioning, repair and maintenance.

**Automation and
Control Systems**

**Food & Beverage
processing**

**Product
Inspection**

Packaging

**Coding and
Traceability**

Our Sectors

قطاعاتنا

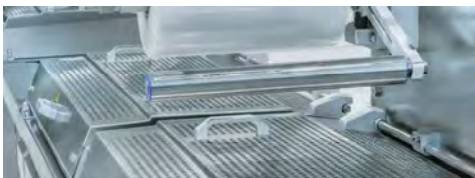

Best equipment from all over the world — the best that technology has to offer

1		BEVERAGE المشروبات	Water & Soft Drinks, Beer, Wine & Spirits, Milk
2		FOOD الصناعات الغذائية	Pasta, Confectionery, Canning
3		PACKAGING التعبئة والتغليف	Boxes & Packages, Crates, Bundles
4		PHARMACEUTICAL الصناعة الدوائية	Medicines, Health Products
5		COSMETICS & HOME CARE صناعة منتجات العناية الشخصية والمنزلية	Cosmetics and Home Care Products
6		LUBE OIL الصناعات الكيميائية	Lube Oil Production
7		PAPER & TISSUE PRODUCTS المنتجات الورقية والمناديل	Paper and Tissue Products Manufacturing
8		MATERIAL HANDLING الخدمات اللوجستية الداخلية	Material Handling Services
9		OTHER INDUSTRIES الصناعات الأخرى	Other Manufacturing Sectors

Rinsers & Sterilisers.

Fully automatic, they are manufactured in different versions according to the hourly output required and to the container to be handled.

Thermo-formers

We supply highest quality thermo-formers and tray sealers. We also supply leak testers, and offer metal detectors for quality assurance testing.

PET Blow Molding

We offer customised solutions for the production of special shaped, traditional designs, heat set and wide mouth containers for a wide range of applications.

Bottle Filling Machines

We offer a complete range of bottling equipment for glass & plastic bottles, cans & jars. For all type of liquids or viscous products and for all sizes of production.

Labelling Machines

We provide the full range of labellers (reel-fed, cold-glue, self-adhesive, modular, pre-cut hot-melt) with the latest technology to achieve top efficiency standards.

End of Line Packaging

Wrap-Around carton, Shrink wrapping and Combi Machinery for the packaging of cylindrical, square, rectangular and oval products in multi-packs at high speed

Fruits and Vegetables Processing Line

Processing lines for Tomatoes, Apricots, cherries, Figs, Olives, Raisins, Pomegranate juice, sweet corn and many others.

PVC-Free Closure Solutions by MEPA Packaging

A MEPA Packaging, we offer high-performance, non-PVC sealing compounds for the global closure industry through our strategic partnership with **Kuanyeh Enterprises Co., Ltd**, a pioneer in ecoconscious closure technologies since 1988.

These PVC-free liners equally require serving stringent global food safety standards including U.S. FDA and EU regulations.

Compatible Closure Types

Plastic Caps	
Aluminum ROPP Closures (28mm / 38mm, glass & aluminum type)	
Crown Corks	
Ring-Pull & Lugged Caps	
Specialty Applications (medical stoppers, lip gloss caps)	

Key Benifits

-  100% PVC-Free – No dioxin emissions, no plasticizers
-  Excellent sealing under pressure & temperature variation
-  Custom liner development available
-  Suitable for carbonated drinks, juices, water, beer, tea, isotonic drinks, and more

Why It Matters

Consumers and regulators are increasingly demanding sustainable, health-conscious packaging. Non-PVC liners eliminate harmful leaching, reduce environmental risks, and align your brand’s global eco-trends.

WARMER / COOLER / PASTEURIZER

The Bieffe Co heat treatment tunnels are designed to adapt to any type of product—including glass or plastic containers, jars, and cans of all sizes—and for any production capacity. Our in-house designed and built control panels allow for simple and intuitive management of all process parameters. All panel components are European, guaranteeing worldwide availability.

Standard Machine Features

► Construction & Frame

- Modular frame of micro-bleached AISI 304 stainless steel.
- Removable, 2B insulated top and side covers for hot zones
- Top covers feature hydraulic sealing for a secure fit.
- Inspection windows on covers and fully enclosed infeed/outfeed with sliding doors.
- 1.5° inclined bottom ensures complete water drainage.

► Drive & Conveyor System

- Rexnord RKHD2000 polypropylene modular belt on herringbone stainless steel profiles.
- Epicycloidal gear motor with a galvanized steel drive shaft and AISI 304 stainless idler shaft.
- Mechanical overload protection (micro-switch) and centralized lubrication on key pins.
- **Pneumatics:** Group includes a manual valve, filter assembly, pressure switch, and safety valve.

Automatic Over-Pasteurization Control

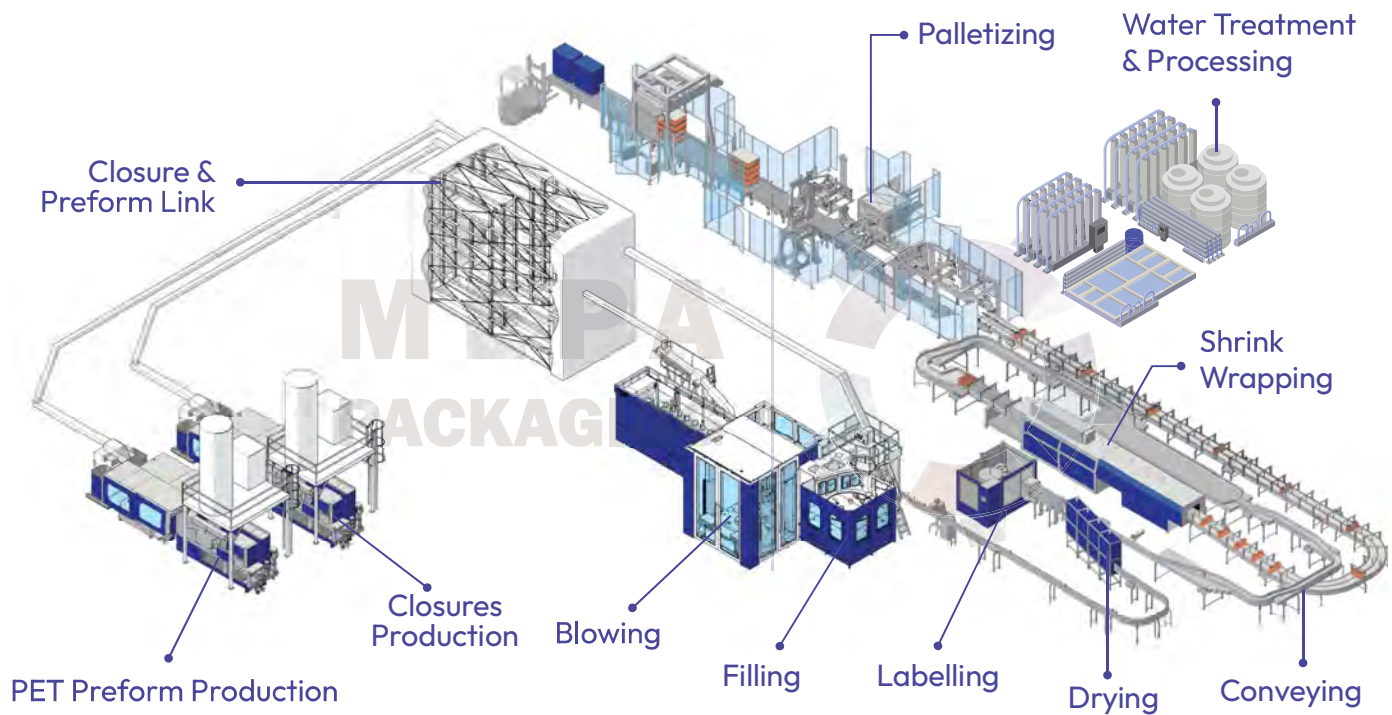

In the case of a prolonged transport shutdown, the system automatically acts to progressively reduce the temperature of the pre-pasteurization and pasteurization sections. The inner belt restarts only when the temperature set points are reached.

The sequence and duration of the temperature reduction are controlled automatically by the PLC, guaranteeing a maximum over-pasteurization of 60%.

For temperature reduction, water from the heating and cooling sections is used via recirculation pumps. The heat exchangers are dimensioned to restore the set points in the shortest possible time upon restart.

CMI Industries

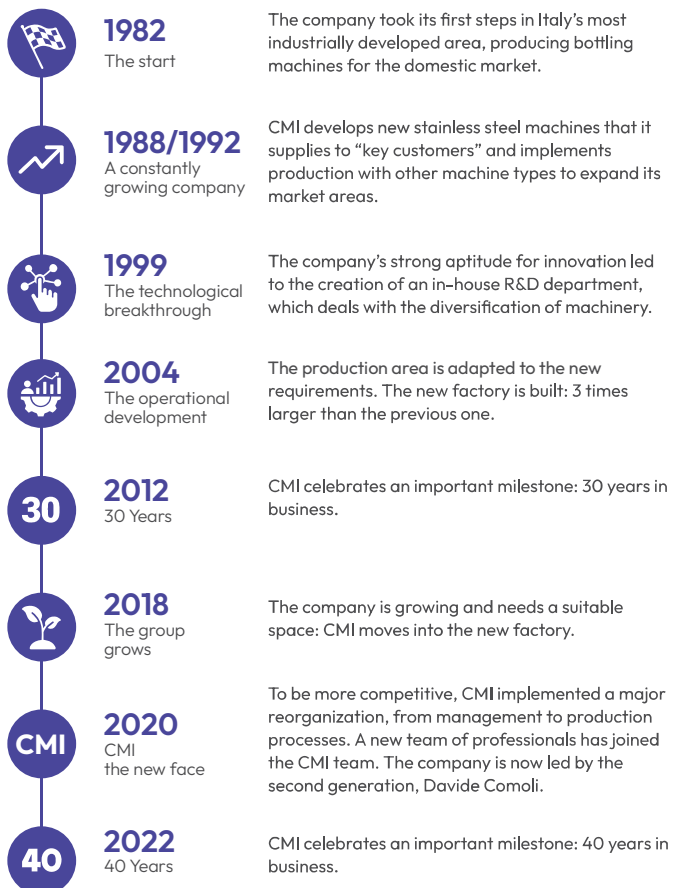

Complete lines - Made in Italy

Since 1982, CMI Industries designs and builds innovative and highly technological machinery for the packaging of chemical, cosmetic, parapharmaceutical and food products.

Our production stands out for the perfect balance between advanced technologies, high efficiency, operational flexibility, low energy consumption and a highly competitive quality/price ratio.

The customization of solutions according to the needs of our customers is at the heart of our company's mission. Our production is completely made in Italy. This means that every part that we do not manufacture internally is supplied by Italian companies located, for the most part, in our same geographical area.

To meet specific customer demands, we've developed patented solutions for bottle and cap sizes and changeovers, ensuring our machines' adaptability and innovation.

Your Needs, Our Solution

CMI Industries stands out as one of the few companies in the industrial landscape that is involved in the production and installation of complete packaging lines. Regardless of the production sector, we specialize in the integration of advanced systems, including mixing, depalletizing, reordering, filling, capping, sleeving, labelling, cartoning and palletizing robots.

Using high-quality materials and advanced technology, we guarantee efficient production at high speeds, with solutions for ATEX environments and GMP certifications.

ACID & CORROSIVE

- Aggressive detergents
- Aggressive degreasers
- Sodium hypochlorite

- Hydrochloric acid
- Alcohol
- Sulphuric acid

- Caustic soda
- Ammonia liquids

INDUSTRIAL & CHEMICAL

- Paints
- Glues

- Mineral oils
- Fertilizers

- Solvents
- Hydrocarbons

HOME & PERSONAL CARE

- Hand Washing Soap
- Disinfectant gel
- Surface detergents

- Face and body lotions
- Hair products
- Perfumes, Deodorants

- Cleaners, Degreasers, Sanitizers
- Shower gels, Shampoos, Conditioners

PARAPHARMA & COSMETICS

- Products for topical use
- Hair products

- Syrups
- Personal hygiene products

- Face and body creams
- Mascara, Nail polish

FOOD & BEVERAGE

- Beverages
- Fruit juices
- Honey and Preserves

- Jams and marmalades
- Spreadable creams
- Dairy, Yogurt

- Mayonnaise, Ketchup, Mustard
- Olive oil, Balsamic vinegar

PET and Closures Molds

Preform Mold

1. Specification: 32, 48, 56, 72, 96, 128, 144, and 160 cavities.
2. Neck finishes: 1716, 1810, 3025, 1881, 2925, 2622, and 38mm.

Applied to: different brands of preform injection molding machines such as HUSKY, NETSTAL, SIPA, SACMI, UNIQUE, HUAYAN, BMB and KATA.

Closure Mold

1. Specification: one-piece cap and two-piece cap.
2. Neck finishes: different specifications such as 26mm, 28mm, 2925, 3025, and 38mm.
3. Cavities: from 12 to 72 cavities.
4. Applied to: different brands of closure injection molding machines and SACMI compression machines.

Blow Mold

1. Different brands of two-step blow molding machines such as SIDEL, KRONES, SIG/KHS, SIPA, SACMI, TECH-LONG, and NEWAMSTAR.
2. Different brands of one-step blow molding machines such as SIPA, ASB, and AOKI.
3. PET containers for beverage industry such as water bottle, CSD bottle, HR bottle, and aseptic bottle.
4. Various containers for the industry of food, edible oil, condiment, cosmetic, toiletry product, and pharmaceutical.

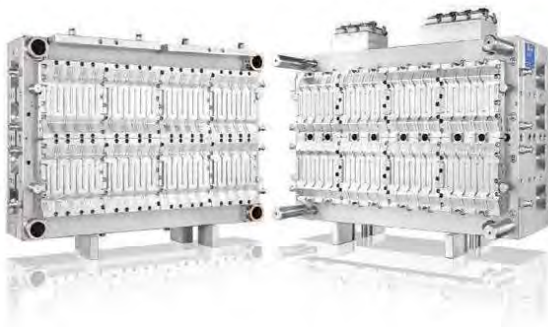

Precise tooling

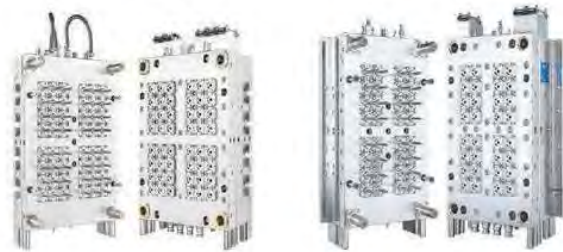

Thin Wall Molds

- Light weight solution.
- Wall thickness: 0.3-0.5mm.
- Valve gate hot runner system.
- Interchangeable stack component design.
- Wear plate design.
- Square-centering cavity design.

Cutlery Molds

- Light-weight design.
- Optimized stacking design/minimized stacking space with highest quantity.
- Multi-cavity design.
- Automatic pick up & packing design.
- Interchangeable mold stack design.
- Hot-gate runner system.
- Packing solution.

Blood Collection Tube Molds

- Valve gate hot runner system.
- Multi-cavity high output design.
- High speed/high capacity.
- Optimized concentricity and roundness.
- Minimized bend/distortion restriction.

In-Mold Labeling Molds

- Precise mold making, ensure the stability of labeling. Product design solution, achieve optimal IML application.
- Thin-wall thickness: 0.25mm-0.50mm.
- Valve gate hot runner system.

Aseptic Carton Filling Machines

Aseptic carton filling machines including a roll-fed aseptic cartons filling machine with a filling speed up to 7000 packages per hour. Our machine offers a cost-effective solution for aseptically filling liquid foods such as water, milk, juice, wine, and tomato sauce. It is easy to operate and maintain. We stand out for our low costs related to consumables, maintenance, and utility consumption.

We also supply high-quality aseptic packaging paper compatible with leading brands, including **Tetra Pak®** machines. Our paper ensures excellent sealing, hygiene, and durability across a wide range of liquid food applications.

ميا تقدم حلولاً لصناعة التعبئة والتغليف

يتزايد مستوى الإنتاجية في شركات التعبئة والتغليف يومًا بعد يوم، خاصة في مناطق الشرق الأوسط وإفريقيا. حلول ميا كانت لها يد حاسمة في تحقيق هذه النجاحات، حيث تقدم معدات متقدمة بتصميمات متكاملة وتقنيات تشغيل حديثة.

مع تزايد الطلب على مواد صديقة للبيئة ومستدامة، يشتد سباق المنافسة في أسواق التعبئة والتغليف. هذا الارتفاع في الطلب دفع بقوة لتحديد أهداف تطوير وابتكار أقوى لتكنولوجيا التعبئة والتغليف.

لهذا السبب، نقدم أحدث موديلات ماكينات البلاستيكية مع التقنيات الحديثة والابتكارات الحصرية. هذه الماكينات تسهل عملية التشغيل، وتزيد من الإنتاجية، وتقلل التكاليف.

بخبرتنا التي تمتد منذ سنة ٢٠١٦ في عالم التكنولوجيا المتقدمة المتغير باستمرار واحتياجات العملاء المتغيرة، أصبح من الضروري أكثر من أي وقت مضى تحويل وإعادة ابتكار عملك.

مع خبرتنا، سنكون معكم في كل مرحلة من مراحل أبحاث مشاريعكم حتى التنفيذ. لهذا السبب، نقوم ببناء شراكات مع عملائنا في مختلف القطاعات لدفع التغيير على نطاق واسع.

نتميز بحلول كثيرة تتماشى مع منتجاتك

بالإضافة إلى كفاءتنا الإدارية والتقنية، نقدم حلولاً مبتكرة ومصممة خصيصاً لعملائنا. نستمتع إلى عملائنا، نحل مشكلاتهم، ونبحث عن حلول بديلة في الظروف الصعبة. هذا النهج يقلل من تكاليف الحلول استناداً إلى احتياجات العميل ويلبي توقعاتهم بأفضل طريقة.

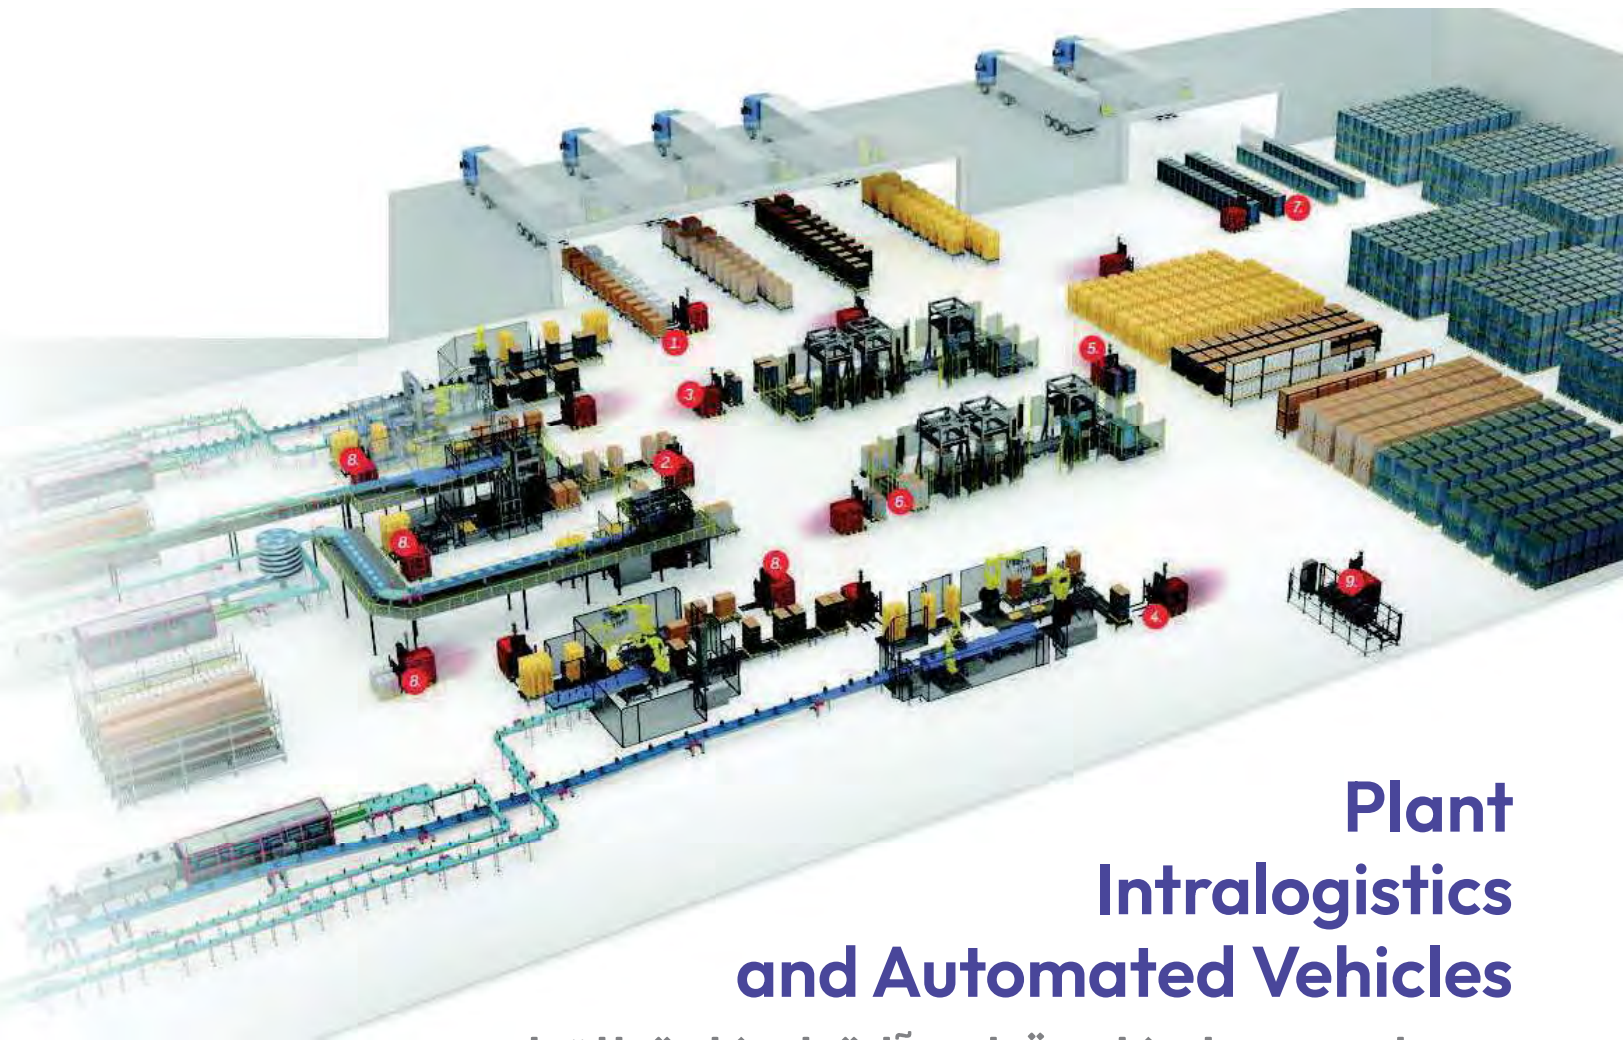

ميا تتفوق وتساعدك على النمو والابتكار

نقوم بإنشاء مسارات لعملك للوصول إلى ذروة جديدة من نجاح المنتج والسوق. الابتكار يساعد في حل المشكلات ويوفر رؤية إبداعية تمكن شركتك من التفكير في الأمور من زوايا مختلفة، سواء كنت تقوم بتطوير منتج جديد أو تحديث استراتيجيتك أو البحث عن طرق مبتكرة للبقاء في المقدمة في مجال التنافس.

الحلول المقترحة تشمل

- تجديد الخطوط المستعملة مع خدمات إضافية
- مواد خام تستخدم في خطوط التعبئة والتغليف
- تصميم القوالب
- حلول النقل
- حلول لوجستية ذكية
- أنظمة تخزين ونقل الحبوب
- أنظمة التبريد
- تكنولوجيا معالجة المياه
- تكنولوجيا معالجة المشروبات الغازية
- تكنولوجيا معالجة العصير
- خطوط التعبئة والتغليف
- مصانع تحضير المشروبات المركزة
- حلول نهاية الخطوط للتعبئة والتغليف والكرتون

Plant Intralogistics and Automated Vehicles

معدات تحميل ذات قيادة آلية او ذاتية القيادة

- 1 Picking of loose product pallet from storage area
- 2 Dropping of loose product pallet onto the depalletiser
- 3 Dropping of pallets from the depalletiser
- 4 Picking of pallets with product
- 5 Picking of wrapped pallet towards the warehouse
- 6 Picking of pallets wrapped by wrapping machine
- 7 Warehouse management and feeding of truck loading bays
- 8 Feeding and picking of consumables (partitions, pallets, reels)
- 9 Automatic battery charger
