

PRESS RELEASE

ALTUNTAS Machinery to Showcase Advanced Baklava Technologies at Saudi Food Manufacturing

Malatya, Türkiye – ALTUNTAS Machinery, one of Türkiye's leading manufacturers of industrial baklava and pastry processing machinery, is proud to participate in Saudi Food Manufacturing, where it will present its latest technologies for industrial baklava production. With more than 30 years of experience, the company designs and manufactures complete production lines and high-performance machines trusted by customers in more than 85 countries.

The centerpiece of the exhibition will be the AL-500 Industrial Dough Sheeter, developed specifically for premium baklava production. Capable of producing perfectly uniform dough sheets from 0.5 mm to 1.5 mm, the AL-500 combines precision engineering, high productivity and exceptional reliability, enabling manufacturers to achieve superior product quality with maximum efficiency.

Visitors will also discover ALTUNTAS' advanced production technologies, including the G-110 Industrial Kadayif Production Machine, ALM Spiral Dough Mixer, EDY-01 Automatic Slicing & Oiling Machine, AS-01 Automatic Syrup Distribution Machine, HSK-01 Dough Spreading & Cutting Machine, AFS Nut Granule Spreading Machine and the G-3B Motorized Rotary Deck Oven.

Manufactured in a modern facility featuring 14,000 m² of covered production area and 25,000 m² of outdoor facilities, every ALTUNTAS machine is engineered to deliver precision, hygiene, durability and long-term performance. Combining innovative engineering with dependable after-sales support, ALTUNTAS continues to set high standards in industrial baklava processing technology.

Visit ALTUNTAS Machinery at Saudi Food Manufacturing and discover the next generation of baklava production technology.
