

End-to-End Industry Transformation Services

The Industrial
Kingdom
CONSULTING SERVICES

Strategic Automation Implementation • Operational Excellence • Sustainability

What We Do

Your **partner** for end-to-end industrial consulting and technical capacity-building services for food & beverage, agri-business, and industrial organizations across the MENAT region. We support transformation from diagnostic and design through implementation and performance stabilization.

Our services focus on automation readiness, operational excellence, and sustainable production practices, helping organizations identify where technology creates value and how to deploy it effectively across production and supply-chain environments.

Who We Work With

- Food & Beverage manufacturers and Agri-businesses
- Industrial and processing organizations
- Cooperatives & Industry Clusters
- Donors, Funding agencies and PPP projects

Turning Industrial Challenges into Sustainable Growth

OUR 4 PILLARS

1

Value Innovation

- Raising the value of your consulting contracts
- Full industry scope under 1 roof

2

Whole-System Approach

- Aligned strategy & expertise
- Team of consultants with complementary skills

3

Risk Minimization

- Reducing the uncertainty of your decision-making
- Saving your time & resources

4

Power Networking

- Regional community network
- Connecting you to industry events & innovations
- Straightforward communication

Core Services

01

Trainings, Workshops & Change Enablement

- Trainings & workshops for operations teams and management
- Workforce upskilling to support digital and automation adoption
- AI-adoption and Digital Transformation programs & consultancy
- Food Loss & Waste reduction programs & consultancy
- Leadership & Emotional Intelligence development with EQi 2.0 Model

02

Operational Excellence & Lean Six Sigma

- Lean Six Sigma-driven performance improvement programs
- Operation assessment for ERP/WMS/ Automation adoption
- Quality consistency, reproducibility, and reliability improvement
- Waste reduction across processing and packaging

Core Services

03

Sustainable Production Practices

- Resource efficiency (energy, water, raw materials, human resources)
- Hygienic design and food safety-aligned process optimization
- Food Loss reduction, by-product valorization
- Alignment with SDGs, ESG and other frameworks

04

Technology & Solutions Execution

- Industrial technology and equipment solutions for Food & Beverage manufacturers and agri-businesses
- Processing, packaging, automation, and material-handling systems optimized for performance, hygiene, efficiency, and scalability
- Integrated production and automation projects, including digital layers (ERP, WMS, traceability)
- End-to-end project execution: technology selection, supplier coordination, installation, commissioning, and ramp-up
- Technical and operational expertise enabling confident investment decisions and faster ROI

05

AI, Digital & Smart Automation Readiness

- Robotic solutions for manufacturing environments, pick & place, palletizing, packaging, and material handling
- Integration of industrial robots, AMRs, co-bots into existing and new production lines
- Automation design focused on productivity, consistency, safety, and space optimization
- System integration with production equipment and Warehouse Management Systems (WMS, ERP, OMS, TMS)
- End-to-end delivery: automation assessment, solution design, integration, commissioning, and performance ramp-up

Why People Choose Us

We combine consulting **depth**, technical **expertise**, and execution **capability**, mobilizing multidisciplinary teams to deliver practical, **implementable solutions**, not just theoretical roadmaps.

What This Means for You

- Faster technology adoption
- Measurable performance improvement
- Empowered teams and operations
- Automation-ready processes
- Sustainable, scalable competitiveness

A Word From Our Founder

After years working alongside leaders in the food & beverage and chemical industries, I witnessed firsthand the challenges manufacturers face in accessing reliable guidance, the right technologies, and fit-for-purpose processes. I also saw how trust-based partnerships and a genuine passion for the industry can be truly transformative.

Today, I bring this experience and network together to offer a consulting service designed to help our clients invest with confidence and grow sustainably.

Valerie Zakka
