OILTEC
STORY

BRAND STORY

The origins of Oil Tec trace back to Cairo in the early 1930s, where **Hag Mohamed Morgan** gained invaluable technical and operational experience while working with foreign-owned soap manufacturing facilities. This early exposure laid the foundation for a deep understanding of industrial production, quality control, and large-scale manufacturing systems.

Building upon this strong industrial base, his son, **Hag Mustafa Morgan**, emerged as a transformational leader in Egyptian manufacturing. In 1940, he successfully established one of the first truly independent Egyptian soap factories. Under his leadership, the business expanded significantly over several decades, growing from a single production facility into a network of three advanced manufacturing factories. This era marked a critical phase of industrial leadership, innovation, and national manufacturing empowerment.

OILTEC

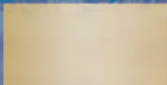

The third generation—**Mohamed Morgan, Ahmed Morgan, and Yassin Morgan**—formalized this multi-decade legacy with the official establishment of Oil Tec in 1999. This marked the strategic consolidation of decades of expertise into a fully integrated industrial oil manufacturing entity. In 2010, the group expanded further with the establishment of Oleo Misr, dedicated to advanced oleochemical production.

Today, under the leadership of the fourth generation, Oil Tec stands as one of Egypt's leading industrial groups in edible oils, oleochemicals, and food-grade manufacturing. The company embodies a powerful fusion of heritage-driven values and cutting-edge industrial technology.

OVERVIEW

ABOUT OILTEC

Founded in 1999, Oil Tec is a fully Egyptian-owned industrial company built on a heritage of experience in the oils and soap manufacturing sectors dating back to 1940. The company operates as a fully integrated food-grade industrial manufacturer specializing in the refining, mixing, filling, packaging, and distribution of edible oils, vegetable ghee, shortening, cocoa butter substitutes.

In addition to oil processing, Oil Tec operates plastic bottle manufacturing facilities, giving the company full control over its primary packaging supply chain. This vertical integration enables enhanced quality control, cost efficiency, production scalability, and rapid market response. Oil Tec serves a diversified customer base that includes government entities, multinational corporations, food manufacturers, horeca operators, retailers, and international distributors.

OUR PHILOSOPHY

Vision:

Leadership in the development of sustainable edible oils, derivatives, and detergents locally and internationally.

Mission:

To be the preferred provider of sustainable value-added products and services for everyone, everywhere, every day.

CORE VALUES

- Quality through delivering high quality products that exceed customer expectations.
- Commitment to R&D and development to achieve competitive advantages.
- Maximizing return on investment in human resources to serve society and the labor market.
- Achieving the commercial success of all success partners (customers, suppliers, and employees).
- Full compliance with all industry legislation, regulatory frameworks, and governance standards.

OUR MESSAGES

AHMED MORGAN

HAG MUSTAFA MORGAN

HAG MOHAMED MORGAN

CHAIRMAN MESSAGE

It gives me great pleasure to address you as the Chairman of Oil Tec, a trusted name in the production of high-quality cooking oils and personal care products, including soaps and related hygiene solutions.

Since our founding, our mission has remained simple yet powerful to enhance the health, hygiene, and well-being of our communities through products that are safe, affordable, and consistently high quality. Today, I am proud to say that Oil Tec has become a household and industrial name recognized for excellence, innovation, and customer satisfaction.

In a rapidly evolving consumer and industrial market, we remain firmly committed to the values that define us — quality, integrity, innovation, and sustainability. Our continuous investments in technology, packaging development, refining efficiency, and people development ensure that we remain competitive across all market segments.

Warm regards,

Chairman
Ahmed Morgan

BOARD OF DIRECTORS MESSAGE

As the Board of Directors of Oil Tec, we are proud to lead an organization that plays a vital role in the daily lives of millions of consumers and industries through its trusted cooking oil, edible fats, and hygiene products.

Our responsibility at the board level is to ensure that Oil Tec continues to operate as a responsible, ethical, and future-focused enterprise, driven by strong governance, transparency, sustainability, and long-term stakeholder value creation.

We remain committed to delivering consistent quality, operational excellence, and continuous growth across local, regional, and international markets.

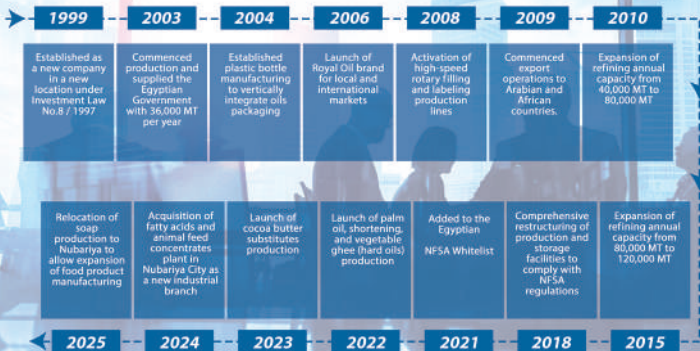

Sincerely,
The Board of Directors
Oil Tec

OUR JOURNEY

OUR JOURNEY & MILESTONES

FACTORY OVERVIEW

Oil Tec operates multiple industrial manufacturing sites equipped with modern utilities, laboratories, storage facilities, logistics infrastructure, and administrative buildings. The total industrial footprint supports high-volume production for both domestic and international demand.

Total Land Area: 38,000 SQM

Covered Production Area: 25,000 SQM

Annual Production Capacity: 160,000 MT

The facilities are designed according to international food safety and industrial engineering standards with high levels of automation and energy efficiency.

PRODUCTION LINES

Oil Tec operates high-speed production lines for refining, blending, filling, labeling, sealing, carton packing, and palletizing. These lines are capable of serving retail, horeca, industrial, and export requirements across multiple packaging formats.

Packaging Formats: from 250 ml to 1000 L and bulk

SOAP MANUFACTURING:

Saponification processes are made from the finest vegetable oils with the capability to produce soaps different ranges, colors and perfumes with finishing in different sizes and packages.

Most of Oil Tec's machinery is European-manufactured, sourced from leading international suppliers including: GIANAZZA, COMACO, AVE, MAZZONI, KAESER, Babcock Wanson, DRM, and Westfalia Separators (GEA).

Research & Development Focus Areas:

- Utilization of industrial byproducts
- Refining performance optimization
- Packaging innovation
- Sustainability solutions

QUALITY CONTROL & LABORATORIES

Oil Tec operates fully equipped in-house laboratories responsible for chemical analysis, heat stability evaluation, shelf-life simulation, and batch consistency verification. All production batches undergo documented quality inspection and traceability prior to release for market distribution.

CERTIFICATIONS

CERTIFICATIONS

Oil Tec operates under full compliance with

ISO 9001 is the world's leading standard for Quality Management Systems (QMS), providing a framework for organizations to consistently meet customer and regulatory needs, enhance satisfaction, and continuously improve processes, applicable to any size or industry.

The Food and Drug Administration (FDA) is responsible for protecting the public health by assuring the safety, efficacy, and security of human and veterinary drugs, biological products, medical devices, our nation's food supply, cosmetics, and products that emit radiation.

BRCGS (Brand Reputation through Compliance Global Standard) is a leading global organization providing internationally recognized certification for supply chain assurance, covering Food Safety, Packaging, Storage & Distribution, Consumer Products, helping businesses ensure quality, safety, legality, and brand protection.

ISO 45001 is an international standard that specifies requirements for an occupational health and safety (OH&S) management system. It provides a framework for organizations to manage risks and improve OH&S performance.

FSSC 22000 (Food Safety System Certification) is a globally recognized food safety standard for any size organization in the food supply chain, combining ISO 22000 with specific Pre-Requisite Programs (PRPs) and FSSC-defined extra requirements, recognized by the GFSI (Global Food Safety Initiative).

The Roundtable on Sustainable Palm Oil was established in 2004 with the objective of promoting the growth and use of sustainable palm oil products through global standards and multistakeholder governance.

ISO 22000 is the international standard for Food Safety Management Systems (FSMS), providing a framework for organizations in the entire food chain from farm to fork to control food safety hazards, meet regulations, and consistently provide safe food, integrating HACCP principles with system management for overall safety.

ISO 14001 is the globally recognized standard for Environmental Management Systems (EMS), providing a framework for organizations to manage environmental impacts, reduce waste, save energy, and meet legal requirements, thereby improving environmental performance and sustainability.

The Egyptian General Authority for Standardization and Quality (EGS) is the official body that grants the Halal mark in Egypt, certifying that products comply with Islamic Sharia standards. The mark is mainly issued for exported products to assure consumers, and it requires meeting specific regulatory requirements.

Sedex is a global technology company that specialises in data, insights and professional services to empower supply chain sustainability. Company reference: ZC5000001890
Site reference: ZC1000001589

GMP stands for Good Manufacturing Practice, a system ensuring products are consistently made and controlled to quality standards, minimizing risks like contamination or mix-ups by covering everything from premises and equipment to personnel training and documentation, ensuring final products are safe, and effective for consumers.

Authorized Economic operator (AEO Egypt) is a certificate provided by The Egyptian Customs Authority certifying that the company meets all international and local standards through applying all relative laws and regulations, which gives the company some privileges in local customs and in different countries' customs who are parties of the program.

The "Proudly Made in Egypt" certification is a symbol of quality and efficiency, awarded to companies that meet the highest manufacturing standards and adhere to best industrial practices.

National Food Safety Authority (NFSA) An independent body established to protect consumers by ensuring food safety and hygiene for all products domestic and imported, handling licensing, and setting regulations for food businesses in Egypt.

FLEET & LOGISTICS

Oil Tec operates an integrated national and regional logistics fleet responsible for the transportation of raw materials, bulk oils, packaged retail products, and export shipments under controlled handling and delivery systems.

A row of metal A-frame signs, possibly for retail or exhibition, recedes into the distance. The signs are arranged in a perspective line, leading towards a bright, glowing blue light source at the far end of the tunnel. The floor is reflective, showing the signs and the light. The overall color palette is dominated by various shades of blue, from deep navy to bright cyan.

SUSTAINABILITY

At OilTec, sustainability is at the heart of our operations. As a trusted leader in the refining and filling of edible oils, we are committed to driving responsible growth through three core pillars:

- Environmental Responsibility
- Responsible Supply Chains
- Accountability

These principles guide our business decisions, as we continue to invest in sustainable initiatives that reduce environmental impact, strengthen our operations, and create lasting value for our customers, employees, partners, and shareholders.

CORPORATE CULTURE

CORPORATE CULTURE

Oil Tec's corporate culture is deeply rooted in family values, integrity, quality, innovation, and continuous improvement.

The company promotes a learning environment that encourages technological adoption, operational excellence, teamwork, and national industrial contribution.

OUR PRESENCE

LOCAL & INTERNATIONAL PRESENCE

Locally, Oil Tec operates as one of Egypt's leading edible oil and food-grade manufacturers supplying government entities, national distributors, supermarkets, and food factories.

Regionally, Oil Tec serves Arabian and African markets through a growing network of distributors and trade partners.

Internationally, Oil Tec is recognized as one of the top 10 edible oils exporters in Egypt since 2016, and top edible oils exporter in 2022, with continued expansion into new global markets.

OIL TEC'S FLAGSHIP

ROYAL OIL – OUR FLAGSHIP PRODUCTS

Royal Oil is Oil Tec's flagship consumer edible oil brand manufactured under full industrial quality supervision.

The brand serves local and international markets with a focus on household cooking, frying performance, food safety, and consumer trust.
