The Earth and our surrounding are an important factor for us, for this reason we BIO-FUELS which are produced from agricultural waste and environmentally friendly fuels.

We use WATER BASED colors, which consist of organic pigments instead of using solvent colors that consist of heavy metals such as copper, chrome, mercury, lead, nickel, and zinc.

All our resin and impregnation operate using waterbased technologies developed throughout our 30 years of experience using the highest international standards; as well as, ensuring a balanced environment in our production facilities.

THE EARTH IS OUR HOME!

Environmentally friendly printing colors technique.

Eco-friendly raw material.

Globally approved Eco-friendly production techniques and standards.
