Take control of fuel costs

- ✓ **Idling Reporting:** Get real-time alerts for excessive idling along with detailed idling history reports to train drivers and prevent fuel inefficiency.
- ✓ **Fuel Claim Fraud Detection:** Get automated checks that match your vehicle's telemetry data against your fuel card transactions to identify fuel fraud attempts.
- ✓ **Fuel Drop Alerts:** View accurate fuel level data in graph form and get notified of potential syphoning based on abnormal drops in fuel level.
- ✓ **Km/litre Reporting:** Compare your vehicles and drivers to others in your industry to understand where you should shift your focus to maximise fuel efficiency.

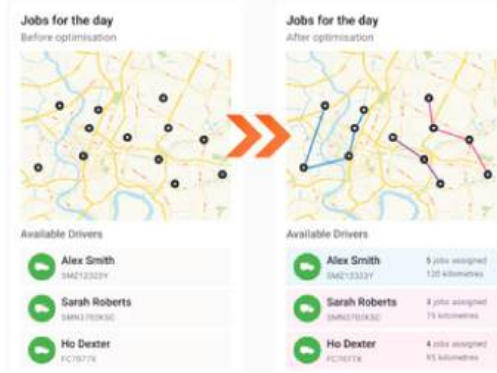

Enhance driver safety

- ✓ **AI Smart Driver Monitoring:** AI cameras detect and alert you about dangerous driving behaviors like phone use, fatigue, and tailgating, providing video footage for investigation and driver coaching.
- ✓ **Speeding Buzzer:** Combat speeding with an in-cabin buzzer that automatically alerts drivers when they exceed pre-set speed limits and get full road speed reporting.
- ✓ **Directly Call into Cabin:** Calls using in-cabin microphone and speaker are automatically answered when vehicles are in motion, ensuring seamless driver communication.
- ✓ **Driver Scorecards:** Gain insight to drivers' road behaviour with scorecards to easily coach drivers on where safer driving practices need to be implemented.

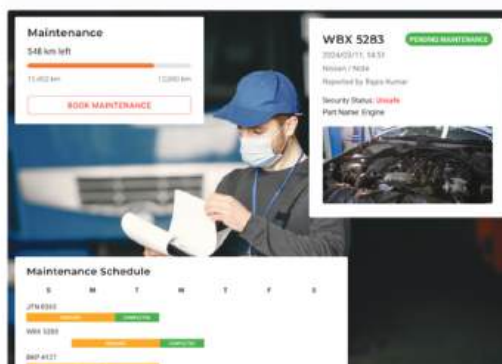

Comprehensive risk management

- ✓ **Geofence Technology:** Set virtual boundaries and get alerts when vehicles enter or exit designated areas, ensuring drivers stay within approved zones.
- ✓ **Sensor & Alert Integration:** Get real-time alerts when your vehicles, cargo, or equipment are misused, with specialised sensors that enhance security and visibility.
- ✓ **Video Evidence for Accidents:** Settle disputes easily and speed up claims with clear footage to prove your driver's innocence in an accident.
- ✓ **Start Prevent:** Prevent unauthorised usage by requiring drivers to authenticate their identity with an approved ID tag before the vehicle's ignition will activate.
- ✓ **24/7 Command Centre Support:** Receive real-time alerts with immediate response, ensuring every potential risk is handled promptly and efficiently.

Maximize fleet productivity

- ✓ **Route Optimization:** Our solution automatically creates the most optimal route based on job details and driver availability, reducing total fleet mileage.
- ✓ **Full Trip History & Working Hours:** Track exactly where your drivers have been and get detailed insights into your vehicle's or machinery's mileage, status and working hours.
- ✓ **Real-Time Job Updates & Proof of Delivery:** Receive live updates on delivery progress and confirm job completion with uploaded images and e-signatures.
- ✓ **Full Productivity Reporting:** Get accurate reports on driver productivity, integrity and safety – highlighting areas for improvement and targeted training.

Automate maintenance and costs

- ✓ **Preventive Maintenance Alerts:** Set maintenance schedules for your vehicles and receive automated alerts for service appointments based on real-time odometer readings and time since last service.
- ✓ **Real-Time Engine Diagnostics:** Receive remote alerts for engine faults and manage mechanical issues proactively with real-time engine diagnostics.
- ✓ **Digital Vehicle Inspections & Maintenance Logs:** Allow your drivers to complete and submit vehicle inspection reports digitally and maintain up-to-date records of your fleet's maintenance history.
- ✓ **Cost Reporting:** Import all costs to get detailed cost by category and cost per job and km reporting to spot leakages and ensure financial sustainability.
