

HDPE Sewer Pipes

The most suitable pipes for sewer systems and other drainage systems, as they have been field-tested for high earthquake resistance, unlike older drainage models. Polyethylene pipes are available in black with a corrugated exterior and a smooth interior.

Specifications and Measurements:

- Black pipes with the option to manufacture with a different interior color.
- Available diameters: **225-300-400-500-600-800** mm.
- Diameter from **(900 -1800)** mm and comes in a length of **12m**.
- Ring stiffness: **4000-8000 N/m²**.
- Available in lengths of **6m** and **12m**, with or without a bell.

Features:

- Safe against leakage or seepage.
- Field-tested for high resistance to corrosion, breakage, and earthquakes.
- High resistance to chemicals and high temperatures.
- Easy to install and connect using various methods such as welding or connectors.

Uses:

- Sewer systems.
- Chemical liquid materials.
- Gas waste disposal in industrial and residential areas.
- Ventilation systems.
- Reinforcing well walls.
