

OUR STORY

Al Wadi has rapidly grown into a trusted name in phosphate mining. While still expanding, our commitment to innovation, quality, and sustainable practices has helped us build strong relationships with key players in the fertilizer and chemical industries. Over time, we've expanded our operations and refined our processes to meet the demands of an evolving market, positioning ourselves as a reliable partner in the mining sector.

OUR SERVICES

Phosphate Mining & Processing

Utilizing cutting-edge technology, we extract and process raw phosphate, ensuring the highest quality standards to meet global market demands.

Logistics & Distribution

With a network of facilities and warehouses, we ensure efficient delivery of our products to clients both locally and internationally.

OUR PURPOSE

MISSION

To sustainably extract and produce high-quality phosphate, driving Egypt's mining growth while supporting local communities and the environment.

VISION

We envision a future where our operations not only drive economic growth but also contribute to environmental preservation and the betterment of society, particularly in Upper Egypt.
