ABOUT US

Control Contracting Engineering (CCE) is Egypt's trusted partner for complete drilling, construction, and mining equipment solutions. Established in 2005 in Cairo, we've grown from a civil contractor into one of the region's leading suppliers of specialized drilling and testing equipment - proudly serving Egypt and expanding across Africa.

With over 20 years of experience, a deep understanding of local market needs, and exclusive partnerships with top international manufacturers, we deliver more than equipment - we deliver performance, partnership, and peace of mind.

Our Mission

To go beyond machinery supply — we deliver complete, reliable, and high-performance drilling solutions tailored to the real needs of the mining and construction sectors in Egypt and Africa.

We are committed to:

- Empowering our clients through seamless access to world-class equipment and technical services.
- Providing full support from supply to field operation and after-sales care.
- Operating with trust, transparency, and professionalism across every project

Our Vision

To be recognized as Egypt and Africa's leading provider of integrated drilling and mining solutions — known for integrity, innovation, and technical excellence — while contributing to sustainable development and national progress.

WHAT WE OFFER

At CCE, we provide complete, end-to-end drilling solutions for the mining and construction industries.

1. Drilling Rig Supply

From multipurpose exploration rigs to geotechnical and water well rigs, we deliver advanced technology from world-leading manufacturers such as Fraste (Italy).

2. Drilling Tools & Consumables

We supply robust, field-proven tools built for performance:

- RC & DTH Drilling Pipes – Perforator (Germany)
- Hammers & Bits – Robit (Finland)
- Diamond Core Tools – Tecso (Spain)

3. Field Operation & Crew Services

We don't just deliver the rig — we can operate it. CCE provides skilled and supervised drilling crews, offering clients full operation and execution support under tight schedules and technical conditions.

4. Aftersales, Maintenance & Technical Support

Our dedicated service team ensures ongoing equipment performance with:

- On-site troubleshooting and spare parts
- Preventive and corrective maintenance
- Client training and system integration

OUR INTERNATIONAL MINING PARTNERS

FRASTE (ITALY):

A global leader in multipurpose and exploration drilling rigs. Fraste offers adaptable and powerful rigs for water well, geotechnical, and mineral exploration applications.

FRASTE Mineral Exploration Range, MX and MX-T series, includes crawler and truck mounted drilling rigs with the newest technical solutions dedicated to the Mining Industry.

Especially designed to offer innovative technologies to maximize productivity and minimize the risk in the job site in any conditions. All FRASTE MX Series rigs can be prepared for diamond coring, reverse circulation and air core drilling, from vertical to 45° angle drilling. All of them can be prepared as real Multipurpose Rigs, with many options available.

OUR INTERNATIONAL MINING PARTNERS

Tecso (Spain):

Specializes in the design and manufacture of drilling tools and core barrels for drilling equipment for mining, geotechnical, civil engineering, and construction since 1974.

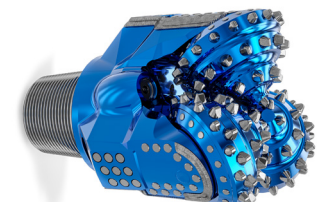

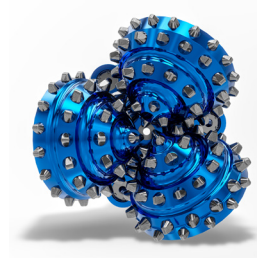

Provides diamond drilling tools used in mineral core sampling, including bits, reaming shells, and rods with precise performance and durability.

Glinik (Poland):

is the leading European provider of roller cone drill bits, hole openers, stabilizers and tools for rotary and blast hole drilling in open-pit mining operations, directional drilling, as well as mining & minerals extraction, and geotechnics. trusted across global quarries and mining sites.

Robit (Finland):

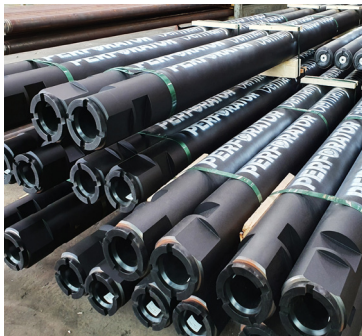

Robit®

Robit is a strongly internationalized growth company servicing global customers and selling drilling consumables for applications in underground and surface mining, construction, geotechnical and well drilling. The company's offering is divided into three product and application groups: Top Hammer, Down the Hole and Geotechnical.

Perforator (Germany):

PERFORATOR

Specializes in RC and DTH drill pipes engineered for depth, durability, and fast sampling. Ideal for mineral exploration and reverse circulation applications.

Perforator drill pipes are used worldwide in infrastructure and tunnel construction projects. They are commonly in open pit mining, oil, gas and water exploration and in the installation of underground pipes, cables or conduits. This can be, for example, a blast hole drilling in mining, a geothermal energy drilling or water well drilling.

Why Leading Clients Choose CCE

- 1- Authorized Agent for 8+ Global Brands
- 2- Local Presence, Fast Delivery, and Field Support
- 3- Strong Track Record in Public Mining Projects
- 4- Expert Engineers and Operation Teams
- 5- Custom Solutions Tailored to Your Site Conditions

CCE is a trusted partner to:

- EMRA – Egyptian Mineral Resources Authority
- Phosphate Misr
- WADICO – Wadi El Nile for Contracting & Investment
- El Nasr Mining Company
- ASCOM Mining Company

Project Highlight

Trusted by EMRA

In 2024, Control Contracting Engineering successfully supplied and supported a multipurpose drilling rig for the Egyptian Mineral Resources Authority (EMRA) — providing full operation support, tools, and aftersales service to meet the Authority's strategic exploration goals.

We're proud to be part of Egypt's mining development journey.
