Installation

High Performance Insulated Panels for Portable Buildings & Warehouses

Advanced insulated panels designed for fast and secure installation, providing effective protection against dust, water, air infiltration, wind, and harsh weather conditions. The Snap-N-Lock system reduces installation time and labor costs while providing efficient thermal insulation for a more stable indoor environment and reduced energy consumption.

Specifications

- ★ Product Code: DP-50-ST
- ★ Available Thicknesses: 50 /100 /150mm
- ★ Metal Support: PPGI / PPGL
- ★ Profile Type: Standard (ST)
Also available: Flat (FL) / Micro Rib (MI)
- ★ Insulation: Polyurethane (PU) -
Polyisocyanurate (PIR)

Installation

High Performance Insulated Panels for Cold Room & Warehouses

High-performance insulated panels designed to minimize heat transfer and maintain required temperatures, helping reduce energy consumption and operating costs while providing a stable and efficient indoor environment.

Specifications

- ★ Product Code: TP-150-ST
- ★ Available Thicknesses: 50 / 80 / 100 / 120 / 150 / 200 mm
- ★ Profile Type: Standard (ST) / Flat (FL)
- ★ Metal Support: PPGI / PPGL
- ★ Insulation: Polyurethane (PU) - Polyisocyanurate (PIR)

ZINOR LIGHT

The Smart Alternative to Traditional Corrugated Zinc Sheets

A lightweight insulated panel combining thermal and acoustic insulation, durability, weather resistance, and easy installation, with a modern and attractive appearance.

Specifications:

Product Code: **ZP-10**

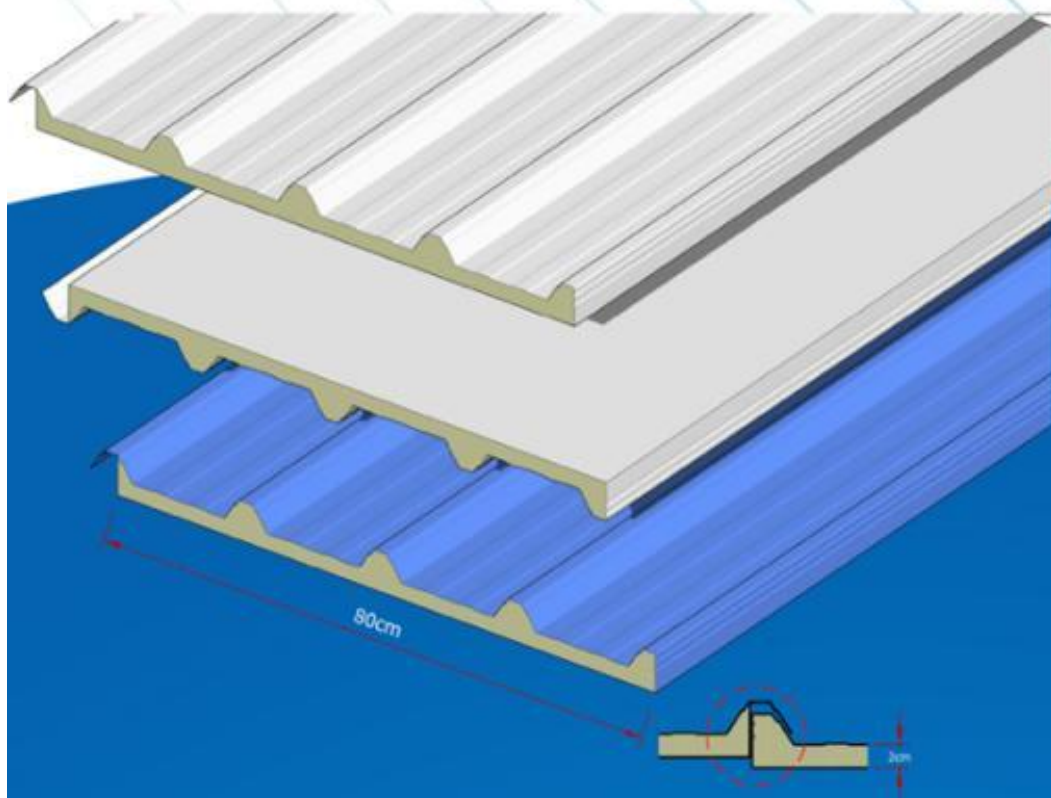

Outer Sheet: PPGI / PPGL

Insulation: Polyurethane (PU)

Insulation Thickness: 10 mm

Inner Facing: Polyethylene Film

ZINOR PLUS

The Specialized Solution for Agriculture & Livestock

An insulated panel offering high resistance to moisture, chemicals, cleaning and sterilization agents, combined with effective thermal and acoustic insulation.

Specifications:

Product Code: **ZP-20**

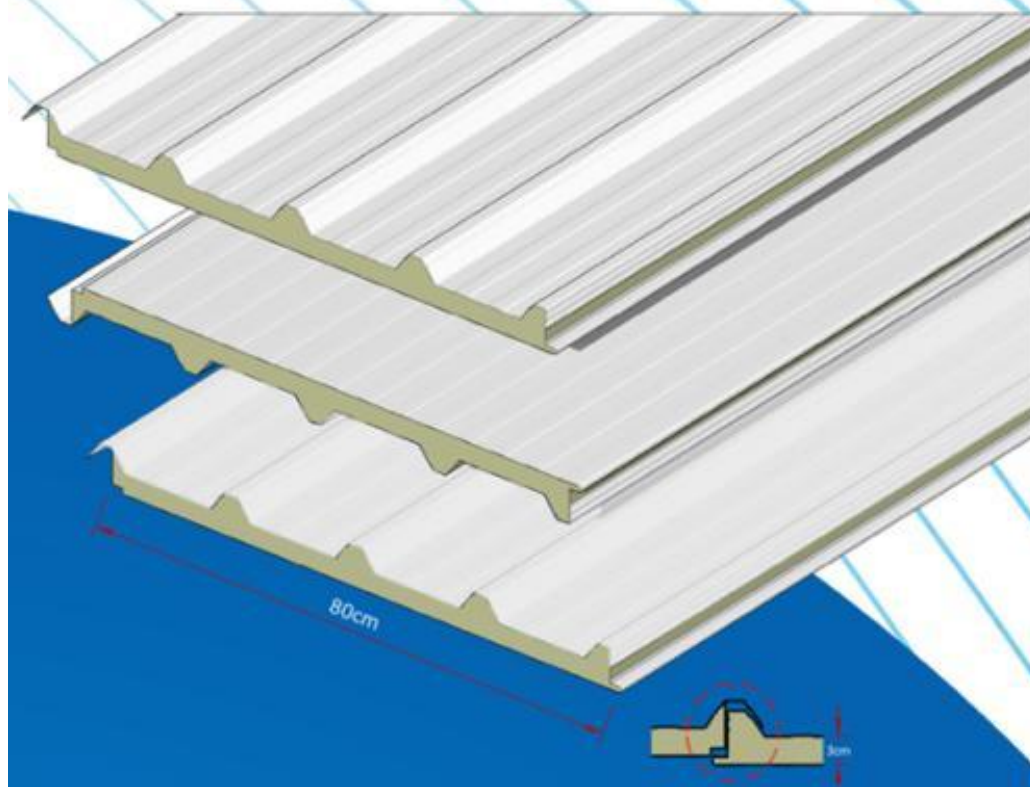

Outer Sheet: PPGI / PPGL

Insulation: Polyurethane (PU)

Insulation Thickness: 20 mm

Inner Facing: PVC-Scrim-MPET(PSM)Facing

ZINOR PRO

The Advanced Alternative to 50 mm Sandwich Panels

A high-performance insulated panel offering excellent thermal efficiency with a lighter construction, making transportation and installation easier while reducing structural loads.

Specifications:

Product Code: **ZP-30**

Outer Sheet: PPGI / PPGL

Insulation: Polyurethane (PU)

Insulation Thickness: 30mm

Inner Sheet: PPGI / PPGL
